Contemporary Women's Issues® on the Web

QUICK REFERENCE CARD

Use Contemporary Women's Issues on the Web when you need to find important information affecting the lives of women around the world.

Contemporary Women's Issues on the Web provides access to publications from over 200 domestic and international organizations. CWI gives you access to an eclectic mix of relevant, hard-to-find content from mainstream periodicals, "gray" literature, and the alternative press.

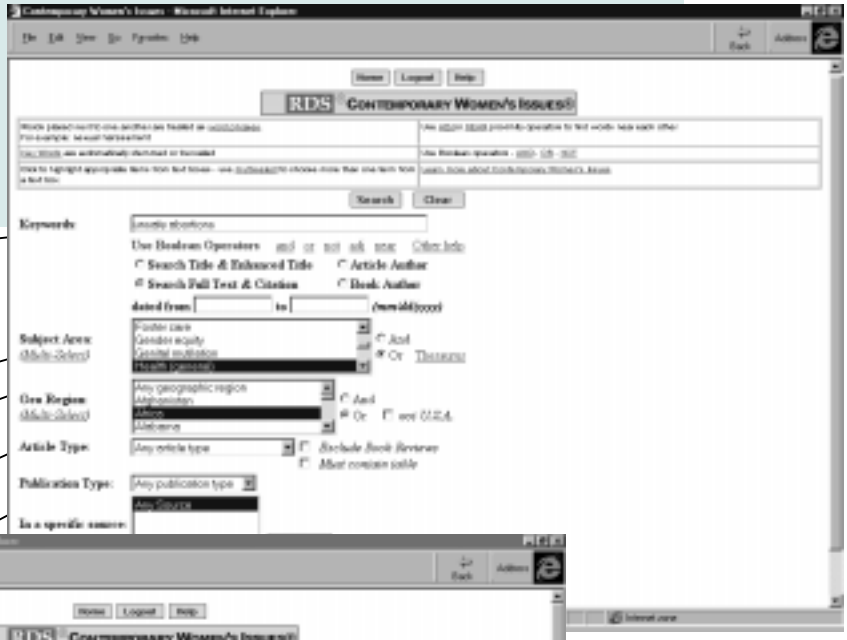
Question: Find information on unsafe abortions in Africa

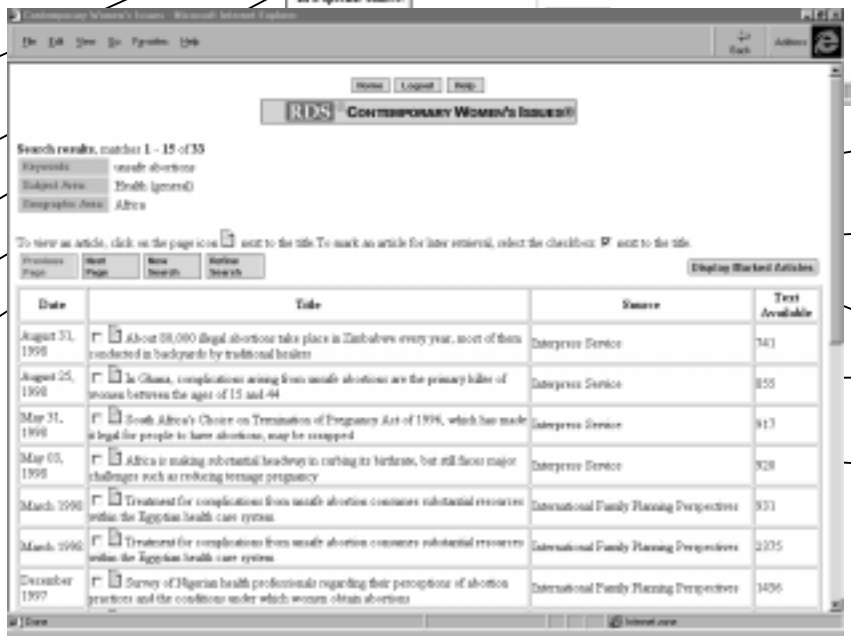
Try the search as shown:

Keywords unsafe abortions
Automatic stemming will check for plurals and other word variations

Subject Area Health (general)

Geo Region Africa





Keywords
words or phrases anywhere in the field you choose with the radio button. Choices are Full Text & Citation, Title & Enhanced Title, Article Author, Book Author

Date
limit by date of publication

Subject Area
limit by general or specific subject area

Geo Region
specific states, provinces, countries or regions

Article Type
specific types of articles

Publication Type
specific types of publications

Exclude Book Reviews
all articles but book reviews

Must Contain Table
articles that have tables

New Search
returns you to a blank search screen

Refine Search
add or delete items from your search strategy

Display Marked Articles
brings up all checked articles

Document Icon
brings up one complete document at a time

Check articles to save for later viewing

It is not required that all fields be used in a search.

Keywords Searching

Use this for unique words or concepts not in the text boxes such as issues, movements or individuals. Combine Keywords with appropriate Subject Area or Geo Region to focus results. Keywords will search the entire record for an occurrence of the term(s) on its default setting.

- Keywords provides automatic stemming so no manual truncation is needed.
- Words typed next to each other are searched as a phrase.
- Combine words using Boolean operators: and or not
- Adj finds words in a specified order within a stated proximity to each other. For example, biracial adj5 adoption finds documents where adoption follows biracial by 5 words or less.
- Near finds words within a stated proximity without regard to order. For example, immigrant near8 discrimination finds occurrences where immigrant and discrimination are within 8 words of each other in any order.
- Parentheses are used to group articles. For example, remedy and (holistic or homeopathic) finds articles that include the term remedy and either holistic or homeopathic.
