

Student Resource Guide

Dear Student,

You received this guide because you have a decision, barrier or challenge that is impacting your academic progress at UofL. No matter what the issue, there are many resources at UofL that are available to help you “get unstuck!” Look over the list below and identify the area(s) that are relevant to you.

One of the purposes for being a student at UofL is to learn how to figure things out and gain problem-solving skills. So, put on your “thinking cap” and use these questions to guide your selection of Resources...and then get connected!

1. What am I trying to achieve or make happen? (Purpose)
2. What facts, data or skills do I need to figure things out? (Information)
3. What have I tried so far and how did it work? Is there another way of approaching this problem? Who can assist me to think differently about my options? (Assumptions)
4. Do I know anyone who has had a similar problem and has been able to solve it? What did they do? Which campus Resource will I contact today? (Point of view)

If...

then...
