Subject Site: Black Leaf Chemical Superfund Site located at 1391 Dixie Highway, Louisville, KY

Dear Marianne,

On approx Sept 09, 2011 we received a series of questions in regard to the site owned by Louisville Industrial Park LLC (LIP). In this letter, the EPA had identified 2 parties as PRP's on this site. One was Occidental Petroleum and the other Exxon Corporation. As property owners through LIP and our desire in trying to get the site remediated and our lack of funds, we would like to have a copy of the PRP's response to the letter you sent them so that we may make contact with these individuals directly. Our goal is to see if we can help in negotiating their assistance in remediating the property in question. Can you also provide documentation that supports their involvement in the subject property either through chain of ownership or other means.

Can you please respond to this request by Nov 16th, 2011 to both emails below or the addresses listed below.
