The purpose of this handout is to introduce you to an easy way to record short video to be uploaded to YouTube with no editing. These are the easy options, if you wish to use more advanced tools this is not the handout for you. The handout is broken down into types of operating systems and the hyperlinks take you to instructions.

**Windows devices**

All Windows devices equipped with a web cam come standard with a tool called [Camera](https://www.windows.com/camera). Use this software to record your video and then [upload to YouTube](https://www.youtube.com/upload).

**Apple devices**

When using Apple desktops, laptop, iPads, or iPhones you can use the following programs/Apps to record video and then [upload to YouTube](https://www.youtube.com/upload)

- Photo Booth
- iMovie
- Camera

**Android devices**

When using Android tablets or phones you can use the Camera app and upload either directly from the app OR [upload to YouTube](https://www.youtube.com/upload).
