

The Box Inline grading tool now has the capability to download student submissions with instructor annotations embedded within the documents. When annotations are present within the document being rendered by Box View Tool a new button will be present for all users to download the document with annotations. Here are the steps to download the annotated PDF.

Students can download the annotated PDF from the Grading pane in any attempt by following these steps once grades and comments have been added to the submission:

1. Go to your course, and access My Grades.

2. Find the Assignment you want to view (this example is Lab 1) and click the title

3. From Review Submission History go to the Right in the Grading pane and click the Dropdown menu next to the submission in the grey section
4. From that dropdown you can click Download Annotated PDF
