YouTube makes it easy to caption videos that are in your account, but you cannot add captions to someone else’s video. Fortunately, Amara.org allows you to caption videos that belong to someone else. (To learn how to use Amara, see the document Captioning Videos with Amara.) This document will show you how to embed a video which has been captioned in Amara into your Blackboard course.

1)  

Go to the video’s page on Amara.org. Choose **Get Embed Code**. You will see a window similar to this one:
2) In another browser window, go to the location in your course where you would like the video to appear.
   a. Choose **Build Content**.
   b. Choose **Item**.

3) Enter a title, then click **HTML**.
4) Embed video

Use the following code to embed this video. See our usage guide for more details on embedding.

Paste this in your document somewhere (closest to the closing body tag is preferable):

```
<script type="text/javascript" src="https://amara.org/embedder-lf3ene"></script>
```

Paste this inside your HTML body, where you want to include the widget, with the width and height of your choosing:

```
<div class="amara-embed" data-height="370px" data-width="620px" data-url="http://www.youtube.com/watch?v=2Jb1Rf1Gca4">
</div>
```

If you would like the widget to be responsive, you can add `data- resizable="true"`. 

---

HTML code view - Google Chrome

```
<script type="text/javascript" src="https://amara.org/embedder-lf3ene"></script>

<div class="amara-embed" data-height="370px" data-width="620px" data-url="http://www.youtube.com/watch?v=2Jb1Rf1Gca4">
</div>
```
Copy and paste both sets of text from Amara into the HTML window in Blackboard and click **Update**. The HTML window will close.

5)

![HTML window](image)

It will look like the text box is empty, but don’t worry! Just click **Submit**.

6)

![Video in Blackboard](image)

The video, with captions, is now available in your Blackboard course. If the captions are not showing, click the **CC** on the Amara bar at the bottom.
