Quick Tour of Exan FacultyAccess

Version: 2.30

Exan FacultyAccess lets you complete your entire workflow from the iPad - from start checks, to approvals, to grading - all the while sending and receiving messages. At a glance, you know which students are ready for procedural approval and you have a description of the procedures at hand. And because you receive immediate notification of student requests and urgent inquiries you can respond to students without the need to cross the clinic floor.
axiUm FacultyAccess is a web-based application for use on a portable tablet device that allows instructors and faculty members to:

- Access Student Lists
- View, Approve, & Evaluate Student Procedures
- Send and Receive Messages

All while on the clinic floor!
