PHYSICIANS IN TRAINING**

What Is Stress?

Dual Meaning

1. The external cause: the “stressor”
2. The person’s reaction
 - Physical
 - Psychological

Six Step Model of Stress

1. Perception
2. Psychological Defenses (coping styles)
3. Psycho-physiological Responses
4. Response Reduction
5. Illness Behavior
6. Illness Measure

General v. Specific Stresses

- General
 - Heat, Cold
 - Hunger
 - Sleep deprivation
- Specific
 - Tied to perception of significance

1. Perception

- How stressful do you find
 - A first date
 - Going to the dentist for a filling
 - A weekend with your parents
 - A flight to NYC
 - ✦ 7 a.m. departure
 - ✦ 11 a.m. departure

MD Professional Stressors*

1. Time Demands
2. Doctor-Patient Relationships
3. Role Responsibility
4. Career – Family Conflicts
5. Inability to Cure
6. Threat of Malpractice

*reported by experienced physicians and residents

2. Psychological Defenses

-Coping mechanisms which serve to reduce the magnitude of responses

- Displacement
- Reaction Formation
- Intellectualization
- Humor
- Suppression

3. Psycho-physiological Responses

- With Awareness
 - Headache, Muscle tension, Mood shifts
- Without Awareness
 - Elevated lipids and BP
 - Low blood sugar

4. Response Reduction

- Exercise
- Muscle Relaxation
- Situational Adjustments
- Psychotherapeutic Interventions
- Medications

5. Illness Behavior

6. Illness Measures

- When coping is not sufficient
- Sustained symptoms
- Sick role/help-seeking
- Diagnosis & Treatment
- Documentation in medical record

Coping with Stress
