Section 1. Chemical product and company identification

Product name : Halocarbon R-11 (Trichlorofluoromethane)
Supplier : AIRGAS INC., on behalf of its subsidiaries
259 North Radnor-Chester Road
Suite 100
Radnor, PA 19087-5283
1-610-687-5253

Product use : Synthetic/Analytical chemistry.

Synonym : Aspen R-11; methane, trichlorofluoro-; monofluorotrichloromethane;
trichlorofluoromethane; trichlorofluoromethane; freon 11; refrigerant 11; f-11;
geneton 11; freon mf; nci-c04637; trichloromonofluoromethane; cfc-11; cfc 11;
propellent 11; frigen 11; halon 11; fc 11; khaladon 11; kaltron 11; isotron 11; eskimon 11

MSDS # : 001052
Date of Preparation/Revision : 3/5/2014.

Section 2. Hazards identification

Physical state : Liquid. [COLORLESS LIQUID OR GAS WITH A CHLORINATED SOLVENT ODOR WHICH IS DETECTABLE >20 % BY VOLUME]

Emergency overview : DANGER!
MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA.
May cause target organ damage, based on animal data.
Contact with rapidly expanding gases can cause frostbite.

Target organs : May cause damage to the following organs: heart, peripheral nervous system, cardiovascular system, upper respiratory tract, skin, eyes, central nervous system (CNS).

Routes of entry : Inhalation

Potential acute health effects
Eyes : Irritating to eyes.
Skin : Irritating to skin.
Inhalation : Acts as a simple asphyxiant.
Ingestion : Ingestion is not a normal route of exposure for gases

Potential chronic health effects
Chronic effects : May cause target organ damage, based on animal data.
Target organs : May cause damage to the following organs: heart, peripheral nervous system, cardiovascular system, upper respiratory tract, skin, eyes, central nervous system (CNS).

Medical conditions aggravated by over-exposure : Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact**
- Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

**Skin contact**
- In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Frostbite**
- Try to warm up the frozen tissues and seek medical attention.

**Inhalation**
- Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion**
- Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Section 5. Fire-fighting measures

**Flammability of the product**
- Non-flammable.

**Products of combustion**
- Decomposition products may include the following materials:
  - carbon dioxide
  - carbon monoxide
  - halogenated compounds
  - carbonyl halides

**Fire-fighting media and instructions**
- Use an extinguishing agent suitable for the surrounding fire.

**Special protective equipment for fire-fighters**
- In a fire or if heated, a pressure increase will occur and the container may burst.
- Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

**Personal precautions**
- Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8).

**Environmental precautions**
- Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Handling: Wash thoroughly after handling.
Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls/personal protection

Engineering controls: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Personal protection in case of a large spill: Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.

Consult local authorities for acceptable exposure limits.
Section 9. Physical and chemical properties

- **Molecular weight**: 137.36 g/mole
- **Molecular formula**: C-Cl\textsubscript{3}-F
- **Boiling/condensation point**: 23.7°C (74.7°F)
- **Melting/freezing point**: -111°C (-167.8°F)
- **Critical temperature**: 198°C (388.4°F)
- **Vapor density**: 4.7 (Air = 1)
- **Specific Volume (ft\textsuperscript{3}/lb)**: 0.6693
- **Gas Density (lb/ft\textsuperscript{3})**: 1.494

Section 10. Stability and reactivity

- **Stability and reactivity**: The product is stable.
- **Conditions of instability**: Under normal conditions of storage and use, hazardous polymerization will not occur.
- **Incompatibility with various substances**: Highly reactive or incompatible with the following materials: organic materials and acids.
- **Hazardous decomposition products**: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- **Hazardous polymerization**: Under normal conditions of storage and use, hazardous polymerization will not occur.

- **IDLH**: 2000 ppm
- **Chronic effects on humans**: CARCINOGENIC EFFECTS: A4 (Not classifiable for humans or animals.) by ACGIH. May cause damage to the following organs: heart, peripheral nervous system, cardiovascular system, upper respiratory tract, skin, eyes, central nervous system (CNS).
- **Other toxic effects on humans**: No specific information is available in our database regarding the other toxic effects of this material to humans.

**Specific effects**

- **Carcinogenic effects**: No known significant effects or critical hazards.
- **Mutagenic effects**: No known significant effects or critical hazards.
- **Reproduction toxicity**: No known significant effects or critical hazards.

Section 12. Ecological information

- **Aquatic ecotoxicity**: Not available.
- **Environmental fate**: Not available.
- **Environmental hazards**: This product shows a low bioaccumulation potential.
- **Toxicity to the environment**: Not available.
### Section 13. Disposal considerations

Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation. Return cylinders with residual product to Airgas, Inc. Do not dispose of locally.
