Section 1. Chemical product and company identification

Product name: Diborane
Supplier: AIRGAS INC., on behalf of its subsidiaries
259 North Radnor-Chester Road
Suite 100
Radnor, PA 19087-5283
1-610-687-5253

Synonym: boroethane; boron hydride; diborane; diboron hexahydride; diborane(6)
MSDS #: 001071
Date of Preparation/Revision: 4/6/2010.

In case of emergency: 1-866-734-3438

Section 2. Hazards identification

Physical state: Gas. [COLORLESS GAS WITH A REPULSIVE, SWEET ODOR]

Emergency overview:
WARNING!
FLAMMABLE GAS.
MAY CAUSE FLASH FIRE.
HARMFUL IF INHALED.
MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA.
CONTENTS UNDER PRESSURE.

Keep away from heat, sparks and flame. Do not puncture or incinerate container. Avoid breathing gas. May cause target organ damage, based on animal data. Use only with adequate ventilation. Keep container closed.

Target organs: May cause damage to the following organs: kidneys, lungs, liver, mucous membranes, upper respiratory tract, skin, eyes, central nervous system (CNS).

Routes of entry: Inhalation

Potential acute health effects:
Eyes: Contact with rapidly expanding gas may cause burns or frostbite.
Skin: Contact with rapidly expanding gas may cause burns or frostbite.
Inhalation: Toxic by inhalation.
Ingestion: Ingestion is not a normal route of exposure for gases.

Potential chronic health effects:
CARCINOGENIC EFFECTS: Not available.
MUTAGENIC EFFECTS: Not available.
TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by over-exposure: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (section 11)

**Section 4. First aid measures**

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact**: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

**Skin contact**: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Frostbite**: Try to warm up the frozen tissues and seek medical attention.

**Inhalation**: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion**: As this product is a gas, refer to the inhalation section.

**Section 5. Fire-fighting measures**

**Flammability of the product**: Flammable.

**Auto-ignition temperature**: 38 to 52°C (100.4 to 125.6°F)

**Flash point**: Closed cup: -90.15°C (-130.3°F).

**Flammable limits**: Lower: 0.9%  Upper: 98%

**Products of combustion**: No specific data.

**Fire-fighting media and instructions**: In case of fire, use water spray (fog), foam or dry chemical.

In case of fire, allow gas to burn if flow cannot be shut off immediately. Apply water from a safe distance to cool container and protect surrounding area. If involved in fire, shut off flow immediately if it can be done without risk.

Contains gas under pressure. Flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.

**Special protective equipment for fire-fighters**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Section 6. Accidental release measures**

**Personal precautions**: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

**Environmental precautions**: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Section 7. Handling and storage

Handling: Use only with adequate ventilation. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Keep container closed. Keep away from heat, sparks and flame. To avoid fire, eliminate ignition sources. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Storage: Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame). Segregate from oxidizing materials. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Section 8. Exposure controls/personal protection

Engineering controls: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Personal protection in case of a large spill: Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product. Full chemical-resistant suit and self-contained breathing apparatus should be worn only by trained and authorized persons.

  TWA: 0.1 ppm 8 hour(s).

Consult local authorities for acceptable exposure limits.
**Section 9. Physical and chemical properties**

- **Molecular weight**: 27.68 g/mole
- **Molecular formula**: B₂H₆
- **Boiling/condensation point**: -92.2°C (-134°F)
- **Melting/freezing point**: -165°C (-265°F)
- **Critical temperature**: 16.7°C (62.1°F)
- **Vapor pressure**: 536 (psig)
- **Vapor density**: 1 (Air = 1)
- **Specific Volume (ft³/lb)**: 12.837
- **Gas Density (lb/ft³)**: 0.0779

**Section 10. Stability and reactivity**

- **Stability and reactivity**: The product is stable.
- **Incompatibility with various substances**: Highly reactive or incompatible with the following materials: oxidizing materials and moisture.
- **Hazardous decomposition products**: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- **Hazardous polymerization**: Under normal conditions of storage and use, hazardous polymerization will not occur.

**Section 11. Toxicological information**

- **IDLH**: 15 ppm
- **Chronic effects on humans**: May cause damage to the following organs: kidneys, lungs, liver, mucous membranes, upper respiratory tract, skin, eyes, central nervous system (CNS).
- **Other toxic effects on humans**: No specific information is available in our database regarding the other toxic effects of this material to humans.
- **Specific effects**
  - **Carcinogenic effects**: No known significant effects or critical hazards.
  - **Mutagenic effects**: No known significant effects or critical hazards.
  - **Reproduction toxicity**: No known significant effects or critical hazards.

**Section 12. Ecological information**

- **Aquatic ecotoxicity**: Not available.
- **Products of degradation**: Some metallic oxides.
- **Environmental fate**: Not available.
- **Environmental hazards**: No known significant effects or critical hazards.
- **Toxicity to the environment**: Not available.
# Section 13. Disposal considerations

Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation. Return cylinders with residual product to Airgas, Inc. Do not dispose of locally.
