Graduate Students: Post-Graduation Education and Employment
2013-14 Executive Summary

The Office of Institutional Effectiveness (IE) administers three surveys related to graduate students’ school and employment plans after graduation:

- **Graduating Master/Doctoral Student Survey** – administered to students at the time they apply for graduation
- **Graduation Card Initiative** – administered to students at the graduation ceremony
- **Recent Graduate Survey** – administered to students who have graduated within the past two academic years

In combination, these surveys provide useful information in regard to graduate school and employment activities about students’ *initial* post-graduate plans, their more *solidified intentions* at the time of graduation, and their *actual* experiences post-graduation. This report summarizes selected student self-reported responses from the surveys that were conducted during the 2013-14 academic year.

**Graduating Master/Doctoral Student Survey**
Each semester since fall 2013, students who have submitted a degree application by the deadline are sent an invitation to complete the online survey. The goal of this survey is to gather exit information from graduating students about their experiences at UofL. Respondents are asked about their perception of and satisfaction with their time at UofL, including academic preparation, experience in their program, academic support services and facilities, other student services and programs, student activities, and their plans following graduation.

**After Graduation**
For the 2013-14 academic year¹, 313 students responded to the survey. Students were asked to identify their most-likely principal activity upon graduation. Of the 312 students who responded to the question, approximately 84% (263) indicated *full-time, paid employment* as their anticipated main activity. Additionally, approximately 6% (19) indicated *additional full-time graduate or professional school*, 5% (16) indicated *part-time paid employment*, and approximately 5% indicated other activities post-graduation [2% (5) indicated *starting or raising a family*, 0.3% (1) indicated *additional part-time graduate or professional school*, 0.3% (1) indicated *volunteer activity* (i.e. Peace Corps), 0% indicated *additional undergraduate coursework*, 0% indicated *military service*, and 2% (7) indicated *other*].

### Most likely principal activity upon graduation

¹Fall 2013 and spring 2014
Salary
We asked those students who would be employed after graduation to provide an estimate of the annual pre-tax salary they would earn. Of the 132 respondents, approximately 21% (28) reported that they would be making $40,000 - $49,999, 9% (12) making $50,000 - $59,999, 19% (25) making $30,000 - $39,999, 8% (10) making $20,000 - $29,999, 9% (12) making $10,000 - $19,999, 2% (2) making less than $10,000, and 26% making $60,000 or more [8% (11) making $60,000 - $69,999, 9% (12) making $70,000 - $79,999, 2% (2) making $80,000 - $89,999, 3% (4) making $100,000 - $149,999, 1% (1) making $150,000 or more. Five percent (7) preferred not to answer and less than 2% (2) indicated another salary.

If you have a job after graduation, please provide an estimate of the annual pre-tax salary you will earn.
Graduation Card Initiative

In fall 2013 and spring 2014, IE used graduation name cards to gather information about graduating students’ post-commencement plans. All students carry a name card during the commencement ceremony. This card is used to ensure that the students stand in correct order and guide the announcer in the pronunciation of the graduates’ name. A brief survey, asking only about post-graduate employment and educational plans, was printed on the reverse side of the card. Staff coordinators at the ceremony directed students to complete the survey. A total of 504 graduate students completed the survey in fall 2013 and spring 2014.

After Graduation

Respondents were asked to indicate their primary employment/education plans after graduation, but some selected more than one activity. Therefore, the percentages reported below and on the pie chart that follows are the percentages of total number of responses (511), not the total number of respondents (501) (the number of responses exceeds the number of individual respondents.)

When asked about their primary employment/education plans after graduation, 52% that they had a job in a field related to their major/program, 33% of the responses from graduates indicated that they would be looking for a job, 8% that they would be pursuing additional education related to their major/program, 3% that they had a job in a field not related to their major/program, 3% that they would be pursuing additional education not related to their major/program, and 2% indicated other plans.

Primary employment/education plans after graduation

- 51% Job in a field related to major/program
- 33% Looking for a job
- 8% Job in a field not related to major/program
- 3% Pursuing additional education related to major/program
- 3% Pursuing additional education not related to major/program
- 2% Other
Recent Graduate Survey

In summer 2014, IE surveyed graduate students who graduated during the 2011-12 or 2012-13 academic year. This survey is intended to be an assessment of the quality and effectiveness of our academic programs and services, and students’ career and job placement post-graduation. Questions are asked pertaining to students’ overall college experience at UofL; their school/college, department, and program; their perceived impact of earning their degree; and their current employment and educational status. Only responses related to employment and education post-graduation are included below. Of the survey respondents 47% (165) graduated in 2011-12 and 53% (188) graduated in 2012-13.

Current Employment

When asked about their current employment status, approximately 72% (252) indicated employment at a job related to their degree program/major, 17% (60) employment at a job not related to their degree program/major, 3% (9) unemployment and seeking employment, and approximately 8% who indicated other statuses [0.3% (1) raising a family, 0.3% (1) military service, 0% (0) unemployment and not seeking employment, 0% (0) participating in a national or international service program (i.e. Peace Corps), and 7% (25) who indicated other].

Current employment status

![Chart showing current employment status]

Level of Employment

We asked those students who were currently employed to indicate their level of employment. Of the 310 who responded, approximately 90% (278) reported working full-time, while 10% (32) reported working part-time.
Salary
We asked those students who were employed to provide their annual pre-tax salary. Of the 307 respondents, approximately 23% (71) reported that they would be making $30,000 - $39,999, 18% (56) making $40,000 - $49,999, 11% (35) making $50,000 - $59,999, 9% (26) making $20,000 - $29,999, 6% (19) making $10,000 - $19,999, 1% (3) making less than $10,000, and approximately 20% making $60,000 or more (9% (28) making $60,000 - $69,999, 6% (18) making $70,000 - $79,999, 5% (16) making $80,000 - $89,999, 4% (11) making $100,000 - $149,999, 1% (3) making $90,000 - $99,999, 1% (3) making $150,000 or more. Six percent (17) preferred not to answer.

Annual pre-tax salary

Additional Education
Recent graduates were asked if they had enrolled in a graduate/professional program or taken additional coursework since earning their undergraduate degree from UofL. Of the 349 respondents, 74% (260) indicated that they had not enrolled or taken additional courses, while 26% (89) indicated that they had.
