Policy for Promotion, Appointment, Tenure and Periodic Career Review in the University of Louisville School of Medicine

Introduction

The purpose of this document is to present the policies, procedures and criteria employed within the School of Medicine (the unit) for the evaluation of promotion, appointment and tenure requests and for periodic career reviews. It is understood that departments may stipulate criteria more rigorous than those addressed in this document provided they are consistent with the University of Louisville's Minimum Guidelines document, *The Redbook*, and the Bylaws and Rules of the School of Medicine. The contents of this unit document apply to all faculty: executive faculty and general faculty as defined in the School of Medicine Bylaws. (A member of the executive faculty of the School of Medicine holds a full-time, academic appointment in the University of Louisville with a primary appointment in the School of Medicine; or may be a part-time or gratis general faculty member who has been elected to the executive faculty).

Changes to the School of Medicine Policy for Promotion, Appointment, and Tenure document and/or its appendices shall be presented for discussion and comment to the Medical Council, Performance Criteria and Policy Committee and the School of Medicine Promotion Appointment and Tenure Committee (SOM PAT Committee). Policy changes and changes to Appendices A and B must be approved by the School of Medicine Faculty Forum, and the School of Medicine Executive Faculty. The Provost shall submit the document to the Faculty Senate for confirmation that it is in accordance with *The Redbook* and the Minimum Guidelines. It shall then be presented to the President for review and recommendation to the Board of Trustees for final approval.

Requests for appointments and promotions to the rank of associate professor and professor (excluding gratis and emeritus actions), award of tenure, and periodic career reviews of tenured faculty must be reviewed by the SOM PAT Committee whose recommendations are forwarded to the Dean of the School of Medicine.

All Executive Faculty members shall have access to this document and, if one exists, a copy of the departmental guidelines for promotion, appointment, tenure, and periodic career review.

I. Classification of Faculty Appointments

A. Full-Time Academic Appointments

Full-time faculty appointments are those at 0.82 to 1.0 full time equivalent (FTE).

1. The requirements for appointment to a full-time faculty position in the School of Medicine shall include, as a minimum, an advanced, usually doctoral, degree (M.D., Ph.D., D.Sc., Ed.D. or equivalent). In disciplines where board certification is available and patient care is provided, appointments at the rank of assistant professor or above shall require board certification. For others, post-doctoral training shall be required for these ranks. Requirements for appointment such as board certification, possession of a license to practice medicine in Kentucky, etc. shall be stipulated in the departmental documents where applicable.

2. The appointee shall sign a contract, approved by the Board of Trustees, stipulating that the appointment is made subject to the regulations, policies, and provisions of employment at the University of Louisville including participation in the School of Medicine Professional Practice Plan.
B. Part-Time Academic Appointments

1. Part-time faculty may be appointed by contract to teach specified courses or to engage in specified instruction, research or service less than full-time for a designated period.

   a. The requirements for appointment to a part-time faculty position in the School of Medicine shall be the same as those for full-time academic appointments. No such appointment, continuation, or renewal thereof shall result in acquisition of tenure or implied renewal for subsequent periods.

   b. Reviews of part-time faculty will be commensurate with the candidate’s % FTE. Although a satisfactory annual review will be a criterion in deciding renewal of contract, there is no guarantee that faculty will be renewed beyond the term of the contract.

C. Non-tenurable Appointments

1. Temporary Appointments

   Temporary appointments to the various academic ranks, which include lecturers and visiting faculty, are those made for specifically limited time periods less than one year for special purposes. In no case shall temporary appointments or renewals result in the acquisition of tenure.

2. Term Faculty Appointments

   a. All non-tenurable full-time faculty who are not “temporary” are “term”. Term faculty are full-time faculty appointments without tenure for a stipulated contract period not to exceed three years. Such appointments are not probationary appointments as described in Section 4.1 of The Redbook, and no such appointments, continuation or renewal thereof shall result in acquisition of tenure or implied renewal for subsequent terms.

   b. Term faculty may be funded through general funds, restricted funds, or clinical revenues.

   c. Term faculty shall meet the standards for appointment to the designated rank with consideration for the areas assigned in the annual work plan and shall be subject to annual and career reviews for faculty of the Unit. Term faculty may apply for promotion in rank according to the criteria in this document.

   d. Term faculty appointments may be renewed for the convenience of the University if the dean determines that the services of the incumbent are needed for the renewal term.

   e. Faculty on term appointments shall be eligible to apply for probationary (tenure track) appointments if they were not previously on a probationary appointment. Productivity during the term appointment may be counted toward the probationary period if requested in writing by the department chair, endorsed by the dean, and approved by the provost at the time of appointment to the probationary track. Transfers out of the probationary appointment back into a non-tenurable status may be requested by the faculty member at any time, but must be completed by the end of the fifth year of probationary status unless probationary period has been extended per Redbook Section 4.4.4.C.

   f. Rolling contracts recognize and reward the accomplishments of term faculty. Rolling contracts of two or three-year duration will be available after five years of service at the University of Louisville. Rolling contracts are only available to those faculty members at the rank of associate professor or above. Rolling contracts are renewable every year for
an additional two or three years. Appointment on such contracts are at the discretion of the chair and be approved by the dean and provost.

D. Probationary Appointments

1. Probationary (tenure-track) appointments are appointments of full-time faculty members without tenure, distinct from those described in Section 4.1.A.2 of The Redbook.

   a. No probationary appointment to the University shall extend beyond the period when tenure would normally be granted (Section 4.2.2 of The Redbook).

   b. Transfers out of a probationary appointment into a non-tenurable appointment may be applied for at any time but must be completed by the end of the fifth year of probationary status unless probationary period has been extended per Redbook Section 4.4.4.C. Transfers back to probationary status after that point are prohibited.

   c. Instructors - Probationary appointments to the rank of instructor shall be for stipulated terms of one year each.

E. Tenure Appointments

1. Tenure is the right of certain full-time faculty who hold academic rank to continuous full-time employment without reduction in academic rank until retirement or until dismissal as provided in Section 4.5.3 of The Redbook.

   a. Tenure is granted in the School of Medicine in accordance with the procedures established in Section 4.2.2.H of The Redbook.

   b. Administrators - Administrative personnel who have acquired tenure are subject to the regulations herein on tenure and the provisions governing termination only in their capacities as faculty members.

   c. Tenure recommendations - Recommendations concerning the award or denial of tenure shall originate in the faculty of the academic units in which tenure is to be granted.

2. Immediate tenure on appointment

   a. Generally tenure will not be granted concurrent with initial appointment; however, a faculty member may be hired with tenure when such action is warranted. (Redbook 4.2.2.E.1.) Ordinarily, in the School of Medicine such actions will be considered only on initial appointment of persons of exceptional merit who already have tenure in another university.

   b. For appointments at the rank of associate professor a minimum of one year must elapse after the initial academic year of appointment, or fraction thereof, before a tenure consideration may be initiated.

F. Joint and Associate Appointments

1. Faculty may have additional appointments outside their primary department (their primary appointment)

   a. Joint appointments as defined in Redbook Section 4.1.4.III.A require that a faculty member’s work plan include a percent effort in the joint (secondary) department and this percent effort must have equivalent associated salary originating from the secondary
department. Career reviews (mid-tenure, tenure, promotion, periodic) are done in both departments.

b. Associate appointments do not entail salary commitments. Criteria for appointment as an associate in a department shall be stipulated by the department. Examples of criteria for associate membership include contributions by associate faculty in teaching, mentoring of students, and research collaborations.

G. Emeritus Appointments

Such honorary title may be conferred upon retirement if requested by the departmental faculty and dean, and approved by the provost and Board of Trustees.

H. Gratis Appointments

1. Gratis (voluntary) faculty appointments can be held at the ranks of instructor, assistant professor, associate professor and professor, prefaced by the designations of “clinical”, for clinical faculty, or “adjunct”, for basic science faculty, and gratis faculty (clinical or basic science) at other institutions.

2. Gratis faculty appointments must be based in departments and are non-tenurable.

3. Gratis appointments and promotions are approved by the Dean (or designee) and do not require SOM PAT Committee review.

4. The term of the initial appointment is at the discretion of the chair, but must not exceed three years for the rank of instructor and five years for all other ranks. Reappointments may be made at the same maximum terms as initial appointments.

II. Conditions of Faculty Employment

A. Annual Work Plan

Each faculty member shall negotiate annually with the department chair a faculty work plan to be signed by both parties indicating their agreement and approved by the Dean. The annual work plan must specify the percentage of effort to be spent in teaching, research and service. Service may be further specified as community service (defined as service to the Department, School, University, Commonwealth, Region or Nation that primarily involves medical and/or basic science expertise), clinical service, and/or service to research. The annual work plan shall specify the requirements for a faculty member’s presence at the University or University-affiliated facilities (Section 4.3.1.A of The Redbook). The faculty work plan shall describe specific goals and objectives to be achieved by the faculty member during the period covered.

1. For faculty in non-tenurable positions the faculty work plan shall be specific to the duties particular to their contract periods and shall reflect the need to demonstrate evidence of excellence in one area of the work plan (typically this is the major area, but may be any area with a 20% or higher effort, if so designated), and proficiency in all other areas of their work plan in order to satisfy the requirements for promotion. There is no required minimum percentage of effort for areas that are assigned in the faculty member’s work plan, but percentages must total 100%.

2. For probationary faculty the faculty work plan shall reflect the need to demonstrate evidence of excellence in one area of the work plan (typically this is the major area, but may be any other area with a 20% or higher effort, if so designated) and proficiency in all other areas of
their work plan in order to satisfy the requirements for the award of tenure. In addition, for probationary faculty a minimum assignment of 20% research and the corresponding time away from service and/or teaching obligations is required.

3. For tenured faculty, the faculty work plan shall respect both the faculty member’s need to shape his/her career and the missions of the department, School, and University. In order to accomplish this, the annual work plan shall permit individual faculty members to concentrate, at various times in their careers, on one or more of the areas of teaching, research and service. Tenured faculty are not required to have assignments in all of the areas of research, teaching, and service. There is no required minimum percentage of effort for areas that are in the faculty member’s work plan but percentages must total 100%.

B. University Practice Plan

1. For full-time faculty, The Practice Plan defines the conditions under which work outside of the University (Section 4.3.3 of The Redbook) may be carried out for all full-time School of Medicine faculty.

III. Faculty Personnel Reviews

A. Annual Review

1. All part-time, term, probationary, and tenured faculty must be reviewed in writing annually by their department chair or designee. The annual review must evaluate faculty performance under the distribution of the effort indicated in the approved annual work plan (Section IV.A of The Redbook’s Minimum Guidelines for Faculty Personnel Reviews).

2. Annual work plans and reviews shall be part of all career review files. Reappointments of term faculty as well as all career reviews (annual, promotion, tenure and periodic) must be based on the annual work plan. Satisfactory annual reviews shall not in and of themselves constitute sufficient grounds for promotion, tenure, or satisfactory periodic career reviews.

3. The appeal process for annual reviews is outlined in the School of Medicine Policies for Annual Reviews and Salary Increases Based Upon Performance (SIBUP) document and is different from the grievance process of Article 4.4 and Appendix A of The Redbook.

B. Promotion and Tenure of Tenurable Faculty

1. Time Required

   a. Each faculty member eligible for tenure must (with the exceptions listed in Article III.B.2 and 3, below) be evaluated by the SOM PAT Committee before the end of twelve months after five years of service applied to tenure. Evaluation for tenure, once originated, in the School of Medicine shall proceed unless the faculty member resigns from the University or is subject to termination.

   b. All probationary faculty who have had seven years of service counted as in a tenurable faculty position, if reemployed full-time shall be granted tenure (as required by Section 4.2.2.A of The Redbook).

2. Leaves of Absence

   One year spent on an officially approved leave of absence may be counted toward the seven years of full-time service necessary for tenure. Any leave granted during the probationary period must carry with it a stipulation in writing as to whether the leave counts toward tenure.
3. Extension of Probationary Period

A faculty member who faces extenuating circumstances that do not require a leave of absence but result in a significant reduction in ability to perform normal duties may request an extension of the probationary period for no less than six months and no more than one year. A second extension may be granted for a second extenuating circumstance. An extension shall not be granted more than two times within the probationary period of a faculty member. Such extensions must be requested and approved at the time the circumstances exist and before the end of the fifth year of the probationary period and must have documentation satisfactory to the dean for recommendation to the provost for approval.

4. Prior Service

Previous full-time service with the rank of instructor or higher in institutions of higher learning may be counted toward the acquisition of tenure. The letter of offer must specifically request that previous productivity at another institution or at the University of Louisville in a non-tenurable position be applied towards tenure and this request must be approved by the SOM dean.

C. Tenure, Promotion and Appointment to Associate Professor of Tenurable Faculty

1. The requirements for promotion to associate professor are equivalent to those for granting tenure. It is recommended that requests be submitted jointly; i.e., a request for promotion should be coupled to a request for tenure. The departmental executive faculty and the chair, as determined by procedures outlined in Appendix B, have the responsibility for initiating consideration of promotion and tenure.

2. The candidate's record shall provide evidence of excellence in the major or designated area of the work plan (no less than 20% effort in the work plan) and proficiency in all other areas of the work plan. Criteria for excellence and proficiency in each area are defined in Appendix A. The individual's accomplishments should indicate promise of continuing proficiency in those endeavors that best support the research and academic mission of the School of Medicine and the University commensurate with the proportion of non-administrative duties in the department.

3. In addition, scholarship, defined as the creation of new knowledge and the dissemination and acceptance of it by peers, must be demonstrated at the time of review. Scholarship in the areas of research, teaching and service is defined in Appendix A.

4. Normally, requests for promotion to associate professor and tenure will not be considered until a full probationary period of five years in faculty status has been served. Requests for early action are appropriate if the faculty member's accomplishments meet the stated criteria. Service prior to employment at the University or while serving in a non-tenurable appointment at the University can be considered in these deliberations if so stated in the letter of offer. A faculty member may request only one evaluation for early tenure. Once originated this evaluation shall proceed as indicated in Section 4.2.2.H of The Redbook unless the faculty member requests its withdrawal.

5. Candidates for new appointments at the rank of associate professor shall satisfy the same criteria as described above for promotion to that rank.
D. Promotion or Appointment to Professor of Tenured or Tenurable Faculty

1. Promotion to professor should be awarded with care and only to those who show promise of continuing excellence in the major or designated area of their annual work plan, and proficiency in all other areas of their work plan commensurate with the percent effort in the department. However, despite this anticipatory element, a recommendation for granting the rank of professor shall be made in recognition of accomplishments already attained.

2. Scholarship must be demonstrated at the time of review. Scholarship in the areas of research, teaching and service is defined in Appendix A.

3. Normally, a minimum of five years in rank as an associate professor shall be served before a recommendation for promotion is considered. Requests for early promotion are appropriate if the faculty member's accomplishments as an associate professor meet the stated criteria. It should be understood that a department is not obligated to make a recommendation after the fifth year; a longer interval commonly is necessary to establish acceptable credentials.

4. Candidates for new appointments at the rank of professor shall satisfy the same criteria described above for promotion to that rank.

E. Promotion or Appointment to Associate Professor of Non-Tenurable Faculty

1. The candidate's record shall provide evidence of excellence in the major or designated area of the work plan and proficiency in all other areas of their work plan. Criteria for excellence and proficiency in each area is defined in Appendix A.

2. In addition, scholarly activity, as defined in Appendix A, on average annually is required.

3. Normally, requests for promotion to associate professor will not be considered until a full period of five years in faculty status has been served. Requests for early action are appropriate if the faculty member's accomplishments as an assistant professor meet the stated criteria.

4. Candidates for new appointments at the rank of associate professor shall satisfy the same criteria as described above for promotion to that rank.

F. Promotion or Appointment to Professor of Non-Tenurable Faculty

1. Promotion to professor should be awarded with care and only to those who show promise of continuing evidence of excellence in the major/designated area of their annual work plan, and proficiency in all other areas of their work plan commensurate with the percent effort in the department. However, despite this anticipatory element, a recommendation for granting the rank of professor shall be made in recognition of accomplishments already attained.

2. In addition, scholarly activity, as defined in Appendix A, on average annually is required.

3. Normally, a minimum of five years in rank shall be served before a recommendation for promotion is considered. Requests for early promotion are appropriate if the faculty member's accomplishments as an associate professor meet the stated criteria. It should be understood that a department is not obligated to make a recommendation after the fifth year; a longer interval commonly is necessary to establish acceptable credentials. Accomplishments made as an associate professor prior to employment at the University can be considered in these deliberations.
4. Candidates for new appointments at the rank of professor shall satisfy the same criteria described above for promotion to that rank.

G. Appointment and Promotion of Part-Time and Gratis Faculty

1. Part-time faculty shall be held to the criteria specified for full-time non-tenurable faculty with consideration for their percentage effort and work plan.

2. Appointment and promotion of gratis faculty is initiated at the departmental level and does not require SOM PAT Committee review. These appointments and promotions are reviewed at the level of the dean (or designee). Specific guidelines and criteria for the appointment and promotion of gratis faculty are provided to departments.

H. Periodic Career Review

All tenured faculty in the School of Medicine (with the exception of department chairs and the dean who are reviewed by other means) shall undergo periodic career review after every fifth year of service to evaluate their contribution to the missions of the University, School of Medicine, and department. Candidates shall be evaluated as either “satisfactory: meeting School of Medicine criteria”, or “unsatisfactory: not meeting School of Medicine criteria”.

1. When the review period ends in a sabbatical (or other leave) year, the career review shall be deferred until the next academic year. A promotion review shall replace career review for the period in which the promotion occurs.

2. Periodic career reviews shall be conducted in the same way as promotion reviews except as otherwise noted in this document. Criteria shall be evidence of excellence in the major or designated area of the annual work plan, and proficiency in all other areas of their work plan, commensurate with the percent effort in the department, for the period under review, and scholarly activity as defined in Appendix A. The review process shall not extend beyond the Office of the Dean of the School of Medicine, but the results of such reviews shall be reported annually to the Office of the Provost.

   a. Tenured faculty members evaluated as satisfactory shall begin the next review cycle in the following academic year.

   b. Tenured faculty members evaluated as unsatisfactory shall prepare a career development plan within 30 days in consultation with the chair that is acceptable to the dean to remedy the deficiency in one year unless the dean approves a longer period. If the faculty member and chair or divisional head are unable to agree upon a career development plan acceptable to the Dean, the Dean may set the requirements to be met so long as the requirements are equitable in light of the obligations and responsibilities expected of faculty at the same rank with comparable work plans as the faculty member under review. If the faculty member completes the agreed upon professional development plan, the faculty member shall then have one year to demonstrate satisfactory performance on a subsequent career review. Meeting all requirements as stipulated in the career development plan will be the criteria used for demonstrating satisfactory performance on the second review. If the faculty member is again evaluated unsatisfactory, the career record of performance shall be forwarded to the Dean of the School of Medicine for appropriate disciplinary action that may include proceedings for termination (Section 4.2.4.B of The Redbook). However, if the faculty member’s performance is evaluated as satisfactory at the time of subsequent career review, the next five-year review cycle begins with the following year.
3. For faculty with non-tenurable and part-time appointments, consideration for reappointment shall serve as their periodic career reviews. The criteria shall be pertinent to their defined areas of appointment and performance. Satisfactory reviews require documented proficiency in all assigned areas of the annual work plan. Although a satisfactory annual review will be a criterion in deciding renewal of contract, there is no guarantee that a faculty contract will be renewed beyond the term of the contract. Non-tenurable faculty who are evaluated as unsatisfactory on annual review may be considered for non-renewal of contract.

4. All University Redbook and School of Medicine rights of due process and appeal for non-tenurable, probationary, and tenured faculty shall pertain in these periodic career reviews.

IV. Departmental PAT Policies

A. Allowance for Departmental PAT Policy Documents

1. Separate departmental documents are not required and their function can be fulfilled by adopting the school's criteria elaborated in this document (Policy for Promotion, Appointment and Tenure and for Periodic Career Review in the University of Louisville School of Medicine) and its accompanying Appendices. However, departments have the option of preparing written criteria that specify additional requirements and procedures for promotion, appointment, tenure and periodic career review.

2. The document must be adopted by a majority vote of departmental executive faculty and approved by the unit Faculty Forum committee and the Dean of the School of Medicine and reported to the University Provost.

B. Requirements of Departmental PAT Policy Documents

1. Departmental documents and procedures shall not disrupt due process nor set performance requirements less stringent than those established in this unit document.

2. Departmental documents must be explicit in specifying the responsibilities of the appointee and the criteria by which proficiency, excellence, and scholarship and other categories, if any, shall be measured. If factors such as professional licensing are required, this must be stated clearly, as well as how documentation shall be established.

3. The document must be explicit in specifying the procedures by which consideration of promotion, appointment, tenure and periodic career reviews are conducted.

4. Departmental PAT documents must not be in conflict with the requirements of The Redbook and Minimum Guidelines and the School of Medicine Policy on Promotion, Appointment, Tenure and Periodic Career Review in the University of Louisville School of Medicine document.

Appendix A

Definitions and Examples of Excellence, Proficiency and Scholarship in the Areas of Research, Teaching and Service

The contents of this appendix cannot be changed without a positive vote of the executive faculty.

Below are the definitions of excellence and proficiency in the areas of research, teaching and service. Excellence and proficiency in these areas includes community-engaged scholarship, a form of scholarship that embraces teaching, research, and service for the mutual benefit of external audiences and the University. Examples include community-based research, service-learning, educational enrichment programs for the public, youth services, public health outreach, and health education. The category of service includes clinical service, community service, and service to research. Service to research refers to the contribution of essential expertise to school of medicine research programs, such as the operation and directorship of core facilities.

I. Definitions of Excellence and Proficiency in Research

A. Excellence in research is defined by the following criteria:

1. The faculty member must have a major responsibility for an independent research program. This includes current extramural funding, with federal funding as principal investigator, including principal investigator on a multi-principal investigator grant, preferred. Alternatively, nationally peer-reviewed funding via multi-year significant grants as principal investigator may be acceptable (e.g., American Heart Association, American Diabetes Association).

a. For award of tenure and for Periodic Career Review, an exception to the requirement for current extramural funding as principal investigator can be made if there is documentation of such funding within the past two years of review and that there is evidence, as assessed and presented by the chair, of the likelihood of future funding. This assessment should include, but is not limited to, reviews of recently submitted grant applications.

b. For promotion to the rank of Professor both current and sustained extramural funding meeting the above criteria (I.A.1) is required.

2. Regular publication (on average at least annually) of original research findings in nationally-recognized (e.g., included in PubMed) peer-reviewed journals for which the faculty member is a major author (defined as first, senior [i.e., the person who directed the research], or corresponding author) is expected. The quality of the journal and the impact of the publication on the field can be considered in the evaluation. For example, an exception to the expected annual rate of publication can be made if the publications during the review period are in exceptionally high ranking journals of international acclaim (e.g., Science, Nature, Cell) and are of substantial content and impact. Published review articles, opinions or perspectives can augment, but not replace this requirement for peer-reviewed original research publications.

3. At the time of tenure review, the individual must have an emerging regional/national recognition in a focused area of research expertise that should be evidenced in extramural letters.

4. At the time of review for professor, the individual must have national/international recognition in a focused area of research expertise that is demonstrated by evidence such as
leadership roles in national forums, consultations such as being an editor or reviewer, or invitations to speak. The national/international recognition should be evidenced in extramural letters.

5. Evidence of excellence in community-engaged research includes non-academic publications and presentations, recognition, citations and awards, and a description of involvement of partners/students in these outputs. Such evidence supplement requirements under I. A. 2. above but do not substitute for on average annual requirement for publication of original research findings in nationally recognized peer-reviewed journals.

6. The successful acquisition of patents can be considered evidence of excellence in research, however dissemination in peer-reviewed media is preferred and must constitute the majority of the documentation of peer acceptance.

7. A leadership role on federally funded entrepreneurial peer-reviewed grants or contracts for technology development linked to U of L, and of demonstrable value to the University, can be considered as contributing to excellence in research, but is not, alone, sufficient to meet these criteria.

B. Proficiency in research is defined by the following criteria:

1. Proficiency in research, including community-engaged research, is best evidenced by regular dissemination of original research findings that is commensurate with the work assignment, the majority of which should be through traditional peer-reviewed nationally-recognized (e.g., listed in PubMed) publications. At least on average annual publication (as either primary or co-author) is expected of faculty with a 20% or greater work assignment. As described in section I.A.2 of this document, quality of publications can be considered. At least one peer-reviewed publication during the period under review is required for those with a research work assignment of less than 20%. Published review articles, opinions or perspectives can augment, but not replace this requirement for peer-reviewed publication of original research findings.

2. Reviews by collaborators, peers and external reviewers must also be obtained and should indicate satisfactory performance compared to others at this stage of the career.

II. Definition of Excellence and Proficiency in Teaching

Teaching is defined as any activity that fosters learning and critical thinking skills, including direct teaching and the creation of instructional materials to be used in one’s own teaching. Examples of direct teaching include lectures, workshops, small group facilitation, role modeling in any setting (such as ward attending), precepting, demonstration of procedural skills, facilitation of online courses and providing formative feedback to learners.

A. Excellence in teaching is defined by the following criteria:

1. Excellence in teaching, including teaching associated with community-engaged teaching, is demonstrated by a documented substantial teaching assignment with a major responsibility for (i.e., leadership role in) a teaching program. Description of the faculty member’s major responsibility for a teaching program, should include concise descriptions of the frequency and duration of the responsibility, outcomes, and evaluations of those outcomes.

2. Reviews by recipients of the teaching efforts (e.g., students or residents) must reflect an excellent teaching effectiveness.
3. Peer and supervisory reviews should document an excellent teaching performance.

4. Additional evidence of excellence in other areas of educator activity may be considered. For example, receiving an award for teaching, engaging in structured mentoring or advising activities, developing new instructional or curricular materials, evidence of learning and critical thinking skills and participation in interdisciplinary teaching efforts, and being an author on a book chapter may all be considered. Descriptions of the quantity and quality of these educator activities should demonstrate excellence.

5. Promotion to Professor

For promotion to professor based on excellence in teaching, extra-university recognition in teaching, curriculum development, advising/mentoring, educational leadership/administration, or learner assessment must be demonstrated. Examples include participation in extramural educational initiatives (examples: election or appointment to regional or national committees involved with teaching, curriculum development, advising/mentoring, educational leadership/administration, or learner assessment; invitations as a visiting professor for teaching activity; convening/chairing a national or regional conference focused on education; invitations to critically appraise or evaluate an educational activity at another institution; participation in subspecialty board review or test development committee; invitation to be an accreditation [ACGME or LCME] site visitor). Extra-university recognition should be evidenced in extramural letters.

B. **Proficiency in teaching is defined by the following criteria:**

1. Proficiency in teaching, including teaching associated with community-engaged teaching, is best demonstrated by a documented teaching assignment and satisfactory supervisory, peer, and learner (e.g., students, residents) reviews of the documented teaching activities. This evidence should include the number of evaluations collected and should summarize the results, including recipient comments when available. Description of the faculty member’s teaching responsibility should include concise descriptions of the frequency and duration of the responsibility, outcomes, and evaluations of those outcomes.

2. Additional evidence of proficiency in other areas of educator activity may be considered, for example engaging in structured mentoring or advising activities, developing new instructional or curricular materials, evidence of learning and participation in interdisciplinary teaching efforts.

**III. Definition of Excellence and Proficiency in Service**

**A. Excellence in clinical service is defined by the following criteria:**

1. Excellence in clinical service is best demonstrated by a documented clinical assignment and a major responsibility for (i.e., leadership role in) a clinical program. The clinician should have measurably and significantly improved the clinical program. Measures of improvement include obtaining funding support for the program through contracts, significantly increased clinical productivity; evidence of significantly increased clinical-service-related collaborative partnerships with the community; evidence of improved health care outcomes, evidence of significantly increased cost effectiveness of the program (for example, improved clinic efficiencies); introduction of new technologies, methods or procedures that contribute to improved health care outcomes; or evidence of a significant contribution to improved public health.
2. Peer and supervisory reviews of the clinical service must be obtained and should support the rating of excellence.

3. Reviews by the recipients of the service (for example colleagues, referring physicians or collective reviews such as patient satisfaction inventories) must also support the rating of excellence.

3. At the time of tenure review, the individual must have emerging regional/national recognition in a focused area of clinical expertise that should be evidenced in extramural letters.

5. Promotion to Professor

   For promotion to professor based on excellence in clinical service, extra-university leadership in clinical service must be demonstrated. Examples include participation in extra-university clinical initiatives (examples: election to national committees, invitations as a visiting professor for clinical activity, participation in subspecialty board review or test development committee, invitation to be an accreditation [ACGME or LCME] site visitor) or participation in extra-university clinical initiatives. The candidate must have extra-university recognition in a focused area of clinical expertise that is demonstrated by evidence such as leadership roles in national forums, or invitations to speak nationally or internationally. The extra-university recognition should be evidenced in extramural letters. With respect to participation in clinical trials, there should be evidence of a leadership role.

B. Proficiency in clinical service is defined by the following criteria:

   Proficiency in clinical service requires a documented clinical assignment and satisfactory peer and supervisory reviews of the service. Reviews by the recipients of the service (referring physicians, collective reviews such as patient satisfaction inventories) must document proficiency.

C. Excellence in service to research is defined by the following criteria:

1. Excellence in service to research is best demonstrated by a documented service-to-research assignment and a major responsibility for (i.e., leadership role) in a clinical or non-clinical research program. The individual should have measurably and significantly improved the research program. Measures of improvement include a significant participation in obtaining funding for the program through contracts or grants, development of new research programs, or increased research productivity of the program including scientific presentations and nationally-recognized (e.g., included in PubMed) peer-reviewed publications.

2. Peer and supervisory reviews of the candidate’s service to research must be obtained and should support the rating of excellence. Reviews by the recipients of the service (e.g., colleagues, principal and co-investigators of clinical or non-clinical research) must be obtained and should support the rating of excellence.

3. Promotion to Professor

   For promotion to professor based on service to research, extra-university recognition in service to research must be demonstrated. Examples of how this could be demonstrated are via scholarship as described in this Appendix, Section IV. Also meeting this criteria are critical participation on funded multi-site (regional, national, international) funded projects and participation in national peer-review of research.
D. Proficiency in service to research

Proficiency in service to research is best demonstrated by a documented service to research assignment and satisfactory peer and supervisory reviews of the service. Reviews by the recipients of the service to research (e.g., colleagues, principal and co-investigators of clinical or non-clinical research) must also be obtained to document proficiency.

E. Proficiency in community and administrative service

Effort in community and administrative service is not ordinarily acceptable as the basis for faculty promotion at the departmental level. Therefore, no definition of excellence in these areas is provided. Significant non-departmental administrative assignments that serve a broader function in the School of Medicine or university (e.g., department chair, assistant, associate, or vice deans) should not be included in the department review. Non-departmental administrative activities should be reviewed independently of the department and unit review by the candidate’s appropriate supervisor.

1. Proficiency in community service

Community service is defined as service to the department, university, region, commonwealth or nation. In order for the activities to be considered, they must involve medical and/or basic science expertise.

Proficiency in community service, including community-engaged service, is best demonstrated by documented service and satisfactory peer and supervisory reviews of the service. Reviews by the recipients of the service or colleagues with knowledge of the service must also be obtained to document proficiency. Community service is defined as service to the department, university, region, commonwealth or nation. In order for the activities to be considered, they must involve medical and/or basic science expertise. Evidence of significantly increased clinical-service-related collaborative partnerships with the community may be presented as a supplement to the activities in service in promotion, tenure, and periodic career review consideration.

2. Evaluation of departmental administrative activities

Administrative activities in the department should be considered in the area to which they apply. For example, administrative responsibility for an educational activity (e.g., residency director; course director) should be considered part of the teaching effort and evaluation. Administrative responsibility for a clinical activity (e.g., clinic director, clinical program director, chief of service) should be considered part of the clinical effort and evaluation. Administrative responsibility for a research activity (e.g., departmental vice chair for research, departmental research coordinator,) should be considered part of the research effort and evaluation.

IV. Definitions of Scholarship in the Areas of Research, Teaching and Service

A. Introduction

Scholarship is required of all probationary (pre-tenure) and tenured faculty for promotion in rank. Scholarship is defined herein as the creation of new knowledge and the dissemination and acceptance of it by peers. Tenure is awarded to those who have an independent, focused, self-sustaining program of scholarship or a leadership role in a focused, self-sustaining program of collaborative scholarship. In any given area, the requirements for scholarship exceed those for proficiency in that the scholar plays a pivotal role in the creation of new knowledge and assumes
primary responsibility for its dissemination. Scholarship need only be demonstrated in one area for tenure and/or promotion on tenure track.

B. Definitions of scholarship

1. Scholarship in research, including community engaged research, includes:
   a. innovations in research (discovery of new findings or application of existing findings in a new way);
   b. documentation of peer acceptance of research scholarship through peer-review publications;
   c. extramural research funding;
   d. presentation of research findings, on average annually, at national forums;
   e. for tenure review: an emerging regional/national recognition in a focused area of research expertise that is evidenced in extramural letters; and
   f. for promotion to professor: a national/international recognition in a focused area of research expertise that is demonstrated by such evidence as leadership roles in national forums, consultations such as being an editor or reviewer, or invitations to speak. The national/international recognition should be evidenced in extramural letters.

2. Scholarship in teaching includes:
   a. innovations in teaching (development of new methodologies or application of existing methodologies in a new way), curriculum, student advising/mentoring, leadership/administration, or student assessment;
   b. documentation of peer acceptance of scholarship through peer-review publications in the area of scholarship of teaching and adult learning;
   c. intramural or extramural funding for teaching initiatives or extramural funding for research efforts;
   d. presentation of instructional innovations/findings, on average annually, at national forums;
   e. for tenure review: an emerging regional/national recognition in a focused area of teaching expertise that is evidenced in extramural letters; and
   f. for promotion to professor: a national/international recognition in a focused area of teaching expertise that is demonstrated by such evidence as leadership roles in national forums, consultations such as being an editor or reviewer, or invitations to speak. The national/international recognition should be evidenced in extramural letters.

3. Scholarship in clinical service includes:
   a. innovations in clinical service (development of new protocols, new clinical programs or the expansion of existing programs);
b. documentation of peer acceptance of scholarship through peer-review publications in the area of clinical service;

c. extramurally funded clinical initiatives or research efforts;

d. presentation of clinical innovations/findings, on average annually, in a national forums;

e. for tenure review: emerging regional/national recognition in a focused area of clinical expertise that is evidenced in extramural letters; and

f. for promotion to professor: established national/international recognition in a focused area of clinical expertise that is evidenced in extramural letters

4. Scholarship in service to research includes:

a. innovations in service to research (development of new protocols, new research programs, or the expansion of existing programs);

b. demonstration of peer acceptance through traditional peer-review publications documenting contributions to clinical initiatives or research efforts;

c. extramural funding for service to research activities or personal research efforts;

d. presentations of research findings, on average, annually in a national forum;

e. for tenure review: emerging regional/national recognition for expertise in a focused area of service to research that is evidenced in extramural letters; and

f. for promotion to professor: national/international recognition for expertise in a focused area of service to research that is evidenced in extramural letters

V. Definitions of Scholarly Activity

A. Introduction

Scholarly activity must be demonstrated regularly (i.e., on average annually) for a satisfactory periodic career review for tenured faculty and is also required for promotion of non-tenurable faculty to the rank of associate professor or professor. Scholarly activity is defined herein as those activities in which faculty take a scholarly approach to education, clinical, and/or research activities. These occur when faculty systematically design, implement, access or redesign educational, clinical, or research activities, drawing from the scientific literature and “best practices” in the field. Documentation describes how the activity was informed by the literature and/or best practices.

Scholarly activities that occur over more than a single year (12 month period) may be counted more than once if there is significant on-going or new effort that takes place in each year (e.g., development of a curriculum in one year, analysis of outcomes/impact data in another). Repeating the same lecture or set of lectures without documentation of on-going evidence or evaluation-based revision would not be considered a multi-year scholarly activity.

Multiple faculty members with involvement in a single scholarly activity may receive credit for the activity provided the individual faculty member can provide documentation of substantial contribution to the activity.
B. Examples of scholarly activity include but are not limited to the following:

1. Scholarship as defined in Appendix A.IV
2. Substantial contribution to a local or national clinical trial (patient recruitments, data collection, other documentable contributions that are important but do not result in authorship)
3. Service as a board reviewer or writing board review questions
4. Active service on a regional or national committee or a board related to clinical care, education, or research
5. Intramural or extramural funding for a clinical or educational project
6. Leadership role in a local, regional, or national conference or in a multidisciplinary intramural conference on education or clinical care
7. Evidence-based development or revision of organizational policy
8. Poster or oral presentation at a local, regional, or national meeting
9. Incorporation of new teaching technology or an evidence-based educational module into a curriculum
10. Leadership or substantial role in a quality improvement project that documents effectiveness or leads to improved processes, clinical care, or outcomes
11. Leadership role in the development or revision of evidence-based clinical practice procedures, guidelines, or treatment algorithms (e.g., order sets)
12. Evidence-based consultation to public officials at community, regional, state, or national venues

Appendix B

Procedures for Tenure, Promotion, and Periodic Career Review
(These procedures are subject to Redbook Section 4.2.2.H and in the event of any discrepancy, Redbook Section 4.2.2.H supersedes)

I. Access to Documentation

In all considerations of appointment, promotion, tenure and periodic career reviews, the personnel documents pertaining to the faculty member under consideration including a current curriculum vitae, personal statement, letters of recommendation, teaching evaluations, reprints of articles, and documentation of other forms of scholarship when appropriate, must be available for review by the voting faculty at least 48 hours preceding the vote on the personnel action.

II. Procedures Regarding Probationary Faculty Members

A. Mid-tenure Review

1. In addition to the annual review, each probationary faculty member shall receive an evaluation in writing at the mid-point of his or her probationary period. This mid-tenure review summarizes achievement in the areas of their work assignments and indicates whether or not progress toward tenure is satisfactory.

2. The mid-tenure review shall be conducted at the same level of rigor and by the same process as in a tenure review, except that extramural evaluations shall not be required (The Redbook 4.2.2.G). The results of the departmental mid-tenure review shall be forwarded to the dean for approval.

3. These evaluations shall be made available to the Promotion, Appointment and Tenure Committee at the time when the faculty member is being reviewed for tenure.

B. Requests for Early Tenure

Only one request for evaluation for early tenure may be made.

C. Evaluation for Tenure

1. Each faculty member eligible for tenure must be evaluated by the School of Medicine Promotion, Appointment and Tenure Committee before the end of twelve months after five years of service applied to tenure unless an extension of probationary status has been previously granted.

2. Faculty members on probationary status shall be affected by any amendments to or change in the criteria for tenure subsequent to their appointment. In such evaluation, appropriate consideration must be given to the amount of time remaining in their probationary period when the change becomes effective.

3. Evaluation shall originate in the department in which the faculty member has primary appointment. The recommendations of the faculty and of the chair shall be forwarded to the School of Medicine Promotion, Appointment and Tenure Committee for its recommendation to the dean, who shall make a recommendation to the provost. For faculty with joint appointments, the recommendations of the non-primary appointment faculty and chair shall also be forwarded to the SOM PAT committee.
III. Protocols for Promotion and Tenure Processes at the Departmental Level

A. Consideration by the Departmental Faculty

1. All recommendations for new appointments, promotions, tenure, or periodic career review shall originate in the department and require appropriate consideration by the appropriate executive faculty of the department. Deliberations may occur either (a) within a departmental committee comprised of eligible executive faculty or (b) by all of the department’s eligible executive faculty. Eligible executive faculty may vote as follows:

   a. Tenured faculty members of the department shall make recommendations on matters of tenure.

   b. Tenured and non-tenured professors of the department shall make recommendations on promotions to professor and periodic career review of professors.

   c. Tenured and non-tenured professors and associate professors of the department shall make recommendations for promotion to associate professor and periodic career review of associate professors.

   d. The entire executive faculty of the department shall make recommendations for new appointments of probationary and tenured faculty members, and for promotions of Instructors to Assistant Professors, and for faculty who are being considered for a change from term track to probationary track appointments.

2. The decision of the appropriate committee as specified above, made by anonymous secret ballot, shall be the departmental recommendation. Similar consideration shall be sought from other departmental executive faculty with their opinion also obtained by anonymous secret ballot. If vote not taken by ballots collected at departmental meeting, an electronic ballot or anonymous mail ballot may be used with responses collected over a minimum of one week.

3. The department chair (or designee) shall be responsible for making all essential arrangements for meetings of such committees. These arrangements shall include:

   a. Notifying the candidate of the nature of the materials to be assembled and furnished to the committee and of the date when the documentation is required. The notification shall include the statement that candidates for promotion or tenure may add information or documents for reconsideration by previous levels of evaluation before the file is forwarded to the Office of the Provost, and may examine any substantive material in the file at any time prior to receipt by the Office of the Provost, but shall not be informed of the identity of the evaluators.

   b. Compiling all annual work assignments and annual evaluations for the file.

   c. Requesting and receiving all intramural or extramural reviews for promotion and/or tenure and preparing a copy of each for use by the candidate after deletion of all identifying items.

   d. Notifying members of the appropriate committee of the date, time and place of the meeting, with provision of at least 48 hours for all members to study the documents in the candidate's file.

   e. Providing to the committee the criteria by which candidates are to be evaluated.

   f. Assembling the committee at the proper time for confidential discussion of the
candidate's qualifications, which shall include any evidence concerning professionalism as well as any supporting materials that the candidate cares to submit.

g. Ensuring that the voting records of each meeting are maintained by the department and shall include the names of faculty eligible to vote, the names of those voting and the results of the vote.

B. Consideration by the Chair

The chair shall prepare a separate evaluation and recommendation that shall be included in the candidate's promotion file. This letter must include comments on extramural evaluations.

C. Compilation of the Promotion/Tenure File

1. The promotion/tenure file shall include all documentary materials employed in the evaluation of the candidate including a copy of the criteria used for evaluation, the recommendations of the department and the chair, and the annual work plans for the candidate covering the period under review. The file shall be compiled with the cooperation of the faculty member.

2. The contents of the promotion/tenure file are the basis for evaluation at all succeeding levels of review and must be considered confidential.

3. Recommendations and any other material added shall become part of the file, as will annual work plans and reviews and the mid-tenure review, if applicable. The faculty member may examine any substantive material in the tenure file but shall not be informed of the identity of evaluators.

4. The faculty member may add newly available material evidence for reconsideration by the previous evaluators or rebuttals before the file is forwarded to the provost. The evidence in this file shall be reviewed according to the procedures specified in *The Redbook* in the Minimum Guidelines and this personnel document.

IV. Protocols for Consideration by the SOM Promotion, Appointment and Tenure Committee

A. Responsibilities of the SOM PAT Committee

1. All recommendations for appointment or promotion to associate professor or professor, tenure, or periodic career review transmitted to the dean are forwarded to the SOM Promotion, Appointment and Tenure Committee for review and recommendation.

2. It is the responsibility of this committee to examine each recommendation for consistency with departmental guidelines and current School of Medicine policies on promotion, appointment, tenure and periodic career review.

B. Response to Disagreements Between Levels of Review

1. When any disagreement concerning promotion, tenure, or periodic career review occurs between the recommendations of the departmental faculty and the department chair; the SOM PAT Committee and/or the departmental faculty and the department chair; and the SOM PAT Committee and the dean; the succeeding review authority (i.e., the department chair; PAT Committee; and dean; respectively) must send a written statement of the reasons for this differing recommendation to the faculty member and to the prior reviewing authority (i.e., departmental faculty; departmental faculty and/or the department chair; and Promotion, Appointment, and Tenure Committee; respectively), each of whom shall have opportunity within 30 days of notification to comment in writing prior to the forwarding of any
recommendation to the succeeding level of review. The SOM PAT Committee may also allow the department chair to attend a subsequent committee meeting to address an unsatisfactory recommendation at the next scheduled PAT committee meeting.

2. The committee's recommendation is transmitted to the dean who is responsible for preparing the unit recommendation. *The Redbook* Section 4.2.2.H.6.A requires notification of faculty by certified mail of a negative recommendation on promotion or tenure by the appropriate vice president, dean or department chair, to allow the candidate to request a hearing before a grievance committee. In tenure cases, if the dean or chair makes a negative recommendation, the faculty member under review has ten days following notification by certified mail within which to file with the appropriate grievance committee.

C. Termination of a Review for Promotion or Early Award of Tenure

Once initiated at the departmental level, the process of review for promotion or early award of tenure shall proceed through the levels described unless the candidate requests in writing that the proceedings be halted (*Redbook* 4.2.2.E.3).

V. Extramural and Intramural Evaluations

A. Required Evaluations

1. Four extramural evaluations are required for each promotion and/or tenure review of probationary faculty.

2. For promotion to associate professor of term track clinical faculty (i.e., those whose work assignment is primarily clinical service or teaching) four intramural letters may take their place.

3. Because evaluations during periodic career review are restricted to the School of Medicine, and these review files do not proceed through university-wide offices, extramural letters of reference will not be required in the personnel file; intramural letters may take their place.

B. Qualifications of Acceptable Evaluators

1. The relationship of external evaluators to the university and the candidate must be clearly stated in the chair's evaluation along with certification of the professional expertise and objectivity. Unacceptable as evaluators are those with collaborative relationships with the faculty member being reviewed within the past five years and former mentors (graduate or post-graduate supervisors). Additional letters from mentors may be included in the file if clearly indicated as such. Former U of L faculty members must have been absent from the University for a period of five years to be acceptable as extramural evaluators.

2. Each candidate will be given the opportunity to suggest names of extramural and intramural evaluators. The candidate will suggest to the chair of the department a list of six M.D., Ph.D., Ed.D., D.D.S. or J.D. (or equivalent terminal degree) evaluators. For tenure reviews or promotions of tenured faculty, the evaluators must hold faculty appointments at other universities at or above the rank for which the candidate is being considered, or be in an equivalent non-academic position. The evaluators must be well established in the candidate's field and qualified to assess the quality of the candidate's contributions to the field. The department chair will review the appropriateness of the evaluators. The department chair may utilize these evaluators or strike names for cause (must be provided in writing and included in the promotion file) and enlist evaluators of his/her own choosing. The candidate will have the right to strike names from the chair’s list for cause (must be provided in
writing). To ensure impartiality, disputes arising from this process will be decided by the dean.

C. Communication with Evaluators

1. The chair will solicit letters of evaluation and will collect them. Requests for evaluations shall specify the average annual work plan for the time period under review and specify that the areas in the work plan (research, scholarship, service and/or teaching) are the area(s) to be reviewed.

2. Comments regarding the quality of the work under review shall be solicited (Section IV.D.5.A of The Redbook’s Minimum Guidelines for Faculty Personnel Reviews). Evaluators will be asked to comment on whether excellence has been demonstrated in the major or designated area of the work plan and proficiency has been demonstrated in all other assigned areas of the work plan. In the case of tenure reviews and promotion to professor of tenured faculty, they will be asked to comment on the quality of the candidate's scholarship.

3. The candidates CV, personal statement, teaching evaluations, clinical evaluations and if applicable, copies of the published peer-reviewed journal articles designated by the candidate as the most significant publications during his/her period of review will be provided to the evaluators.

4. The candidate shall be provided an opportunity to respond in writing to the evaluation(s), and this response must be included in the review materials prior to consideration of the evaluation by any reviewing body, including the departmental committee.
