

Parent-Child Interaction and Language Learning Laboratory

Department of Psychological & Brain Sciences, University of Louisville

We need you and your children!

The Parent-Child Interaction and Language Learning Laboratory is studying language development in children.

If you and your children (3 months to 3.5 years old and/or 6 years to 12 years old) are invited to participate in a 60 min. study to help answering these questions:

- How do older children talk to their infant siblings?
- How do older children talk to infants?
- How does that compare to how older children talk to adults?

You will be paid for participation!
