

RACER Lab (Research on ADHD and Children's Emotion Regulation)

<http://louisville.edu/psychology/rosen/lab>

Professor: Paul J. Rosen, Ph.D.

Type of position: PSYC 491 or volunteer. Opportunities for completion of Honors thesis are available for student that have completed at least 1 semester of volunteer or PSYC 491 work within the lab.

Time commitment: Two semester commitment required, 10 hour per week minimum

Semesters position is available: Spring, Summer, and Fall annually.

Location of work: Davidson Hall, Rm. 308 B

Requirements: GPA of 3.0 or greater preferred, junior-senior eligibility preferred, must have completed PSYC 301

Brief description of project: 3-4 undergraduate research assistants are needed for an ongoing study of mood and behavior in children with ADHD. The studies examine differences in the emotional and behavioral difficulties among school-aged children with and without ADHD.

Specific tasks: Responsibilities include running sessions with children and parents, watching and coding videotapes of children completing study tasks, entering data, attending lab meetings, and assisting with the study. Opportunities exist for analyzing data and/or writing up research studies if interested. A two semester commitment is required. Assistants may serve on a volunteer or for-credit (i.e., PSY 401) basis.

How to apply: If you are interested, please send a resume and an unofficial transcript to Paul J. Rosen, Ph.D. at paul.rosen@louisville.edu.
