Adding a MAT 55 class:

Before first day of class: If the class you need is closed, place yourself on the wait list and space will be made for you if possible. Be sure you have not enrolled in another class that creates a time conflict for this one. Be sure that, with this class, your total credit hours for the semester do not exceed your limit. (The registrar may have pre-registered you in a 00 section of the MT class. You should first drop that section before adding another section).

Once classes begin: If the class you need is closed, request the instructor's signature on this form, along with the Department Head's signature, date, and

Dropping an MT class after the published "Last Date to Withdraw": You must request the MT instructor's signature on this form. Do NOT use the A&S Appeals Form for MT classes.

*******If you withdraw, you *must* re-enroll in this course (or a lower level MT course) for next semester. *******

If you placed into a Math Pathways course (MAT 55) based on ACT or Accuplacer score, UofL requires that you enroll in this course and progress in sequence until you complete GEN 103 or 104. Then, you must immediately enroll in a 100-level Math course the following semester based on your major (e.g., 105, 109, 111, 151, etc.).

Once you have obtained the instructor's signature and the Pathways Department Head's signature and stamp, submit this form to the Registrar's Office in Houchens, LL31. For assistance, see George Kistner in SK 229.
