Emergency Action Plan
2.0 Emergency Action Responsibilities

2.1 The Department Chair’s, and the HSC Bookstore Manager are responsible to ensure that each department uses the model DEHS Emergency Action Plan and develops a department specific plan.

2.2 Jack Shelman is the Building Emergency Coordinator (BEC), he has been assigned by the Department Chairperson and is responsible for this plan and employee education regarding this plan. Jack Shelman will also coordinate the testing of the plan annually. Testing will entail conducting an emergency exercise for one chosen section of the plan. During an emergency he would implement the Building Emergency Action Plan and coordinate emergency actions to ensure the safety of the people in this building. The emergency duties include:

- Ensure that the notification to emergency agencies takes place. (DPS or 911).
- Assist in building evacuation.
- Report to the assembly area.
- Account for evacuated personnel.
- Collect essential information for emergency personnel (i.e., location of the incident, persons still in building, special hazards in the building, unique conditions).
- Develop specific procedures to assist persons with physical disabilities that are assigned to the department.
- Assist physically disabled employees, students or visitors.
- Implement the post emergency procedures

2.3 Emylene Rodenas is the Assistant Building Emergency Coordinator (ABEC) will assist the BEC and will be responsible for the BEC’s duties if he is unavailable.

2.4.1 Jack Shelman is the HSC Bookstore (1st Floor) Floor Leader (FL) and is responsible for coordinating the Emergency Action Plan for the HSC Bookstore. The emergency duties of the FL include:

- Ensure all persons are evacuated.
- Designate volunteers to assist individuals with disabilities.
- Conduct a sweep of the floor and ensure that all doors are closed, elevators empty and critical operations stabilized.
- Assist physically disabled employees, students or visitors.

* as personal safety and time permits

UoFL

Emergency Action Plan
2.4.2 Deborah Young is the Child and Youth Project (first floor) Floor Leader and is responsible for coordinating the Emergency Action Plan for the Child and Youth Project.

2.4.2.2 Lee Ann Mingus is the Assistant Child and Youth Project (first floor) Floor Leader and is responsible for the Floor Leader's duties if she is unavailable.

2.4.3 Emylene Rodenas is the School of Nursing (3rd Floor) Floor Leader (FL) and is responsible for coordinating the Emergency Action Plan for the School of Nursing. The emergency duties of the FL include:
   X Ensure all persons are evacuated.
   X Designate volunteers to assist individuals with disabilities.
   X Conduct a sweep of the floor and ensure that all doors are closed, elevators empty and critical operations stabilized.
   X Assist physically disabled employees, students or visitors.
   • as personal safety and time permits

2.4.3.1 Ann English is the School of Nursing (3rd Floor) Assistant Floor Leader (AFL) will assist the FL and will be responsible for the FL's duties if she is unavailable.

2.4.3.2 Rita Wedig is the 2nd floor Floor Leader (FL) and is responsible for coordinating with the 3rd Floor FL the Emergency Action Plan for the School of Nursing. The emergency duties of the FL include:
   X Ensure all persons are evacuated.
   X Designate volunteers to assist individuals with disabilities.
   X Conduct a sweep of the floor and ensure that all doors are closed, elevators empty and critical operations stabilized.
   X Assist physically disabled employees, students or visitors.
   • as personal safety and time permits

2.4.4 Susi Day Walsh is the School of Public Health (4th Floor) Floor Leader (FL) and is responsible for coordinating the Emergency Action Plan for the HPSIS. The emergency duties of the FL include:
   X Ensure all persons are evacuated.
   X Designate volunteers to assist individuals with disabilities.
   X Conduct a sweep of the floor and ensure that all doors are closed, elevators empty and critical operations stabilized.
   X Assist physically disabled employees, students or visitors.
   • as personal safety and time permits

UofL

5

Emergency Action Plan
2.4.4.1 Peggy Beachy is the School of Public Health (4th Floor) Assistant Floor Leader (AFL) will assist the FL and will be responsible for the FL's duties if she is unavailable.

4.0 Emergency Action Plan - Fire

4.1 This section of the Building Emergency Action Plan will be implemented in the event of:
X A fire alarm activation.
or
X A fire discovered by building occupant.

4.2 Any employee, student, or visitor that becomes aware of a fire shall immediately activate the building fire alarm system. The fire alarm system will in turn notify all building occupants that a fire emergency exists. This is accomplished through sounding an audible alarm and a visual flashing red light. All employees, students and visitors will regard any activation of a fire alarm as a true fire emergency unless there has been previous notification of the alarm system being tested.

4.3 The BEC will contact Public Safety at 502-852-6111 and notify the dispatcher that a fire alarm in the building has been activated. If DPS does not answer, call the Fire Department at 911.

4.4 All occupants will immediately leave the building utilizing the escape routes outlined in Appendix A. Occupants may collect their valuables (purse, coat, etc.) and should close, but not lock, their door upon leaving. Any occupant who comes into contact with a student or visitor should direct them to evacuate the building. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals from the building. DO NOT USE ELEVATORS.

4.4.2 Building occupants should make no attempts to extinguish the fire.

4.4.3 Procedures for Providing Assistance to Mobility Impaired Individuals When an Emergency Exist and Elevators are Unavailable are found in Appendix C.

4.4.3.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

4.5 Once out of the building, all occupants should gather by department at the following locations to be counted: HSC Bookstore – Front of store on Floyd St. Side, Child and Youth Project – Northeast corner of Abel Administration Building, School of Nursing – In front of Abel Administration Building on Chestnut side, School of Public Health – Northwest corner of Abel Administration Building. Floor Leaders or Building Emergency Coordinator will conduct a roll call of employees to determine if everyone has vacated the building. No employee should leave the assembly area, either to re-enter the building or leave the campus, until advised to do so by the Building Emergency Coordinator.
4.6 The Building Emergency Coordinator will provide information to the DPS officer, the University Emergency Coordinator or the Fire Department Officer in Charge. This information may include, but is not limited to:

- Location of the fire,
- Status of the evacuation, personnel missing that may still be in the building, and
- Special hazards associated with the building.
5.0 Emergency Action Plan - Severe Weather

5.1 This section of the BEAP will be implemented in the event of a severe weather warning.

5.2 The K Building has 4 NOAA Weather radios in the following locations: the Bookstore Service Desk, C&Y front desk, room 3019 reception desk, and room 4026 reception area. These radios are dual powered working on both batteries and/or the buildings electrical service. These radios will be activated by the National Weather Service to announce any watches or warnings. Each department will designate an employee to monitor their radio for any emergency announcements and notify the Building Emergency Coordinator of any warnings (Bookstore – Jack Shelman, C&Y – Deborah Young, Nursing – Receptionist, and Public Health – Peggy Beachy). Additionally, any employee that becomes aware of a severe weather warning will immediately notify the Building Emergency Coordinator. The Building Emergency Coordinator will immediately notify employees by either word of mouth, telephone or public address announcement. This notification will advise building occupants of the type of warning (thunderstorm or tornado) and to implement the Emergency Action Plan - Severe Weather. Anyone with access to a computer may go to internet site or for weather information.

5.3 Once occupants have been notified of a thunderstorm warning, they should take no other steps than to ensure that they are prepared if conditions deteriorate.

5.4 Once occupants have been notified of a tornado warning, they should gather their valuables and take cover. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals. Office doors should be closed upon exiting. Building occupants should take cover in the areas outlined in Appendix B.

5.4.1 Procedures for providing assistance to mobility impaired individuals when an emergency exist and elevators are unavailable are found in Appendix C.

5.4.1.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

5.5 The Floor Leaders and/or Building Emergency Coordinator will conduct roll calls to ensure that all employees are in the shelter areas indicated in appendix B. If an employee is missing, the Building Emergency Coordinator will make a determination whether it is safe to search for the missing employee(s) and assign someone to find them and have the missing employee(s) move to the shelter areas.

UofL

11

Emergency Action Plan
5.6 If injuries or building damage occurs, notify DPS by calling 502-852-6111. If DPS does not answer, call 911 for local emergency services.

5.7 Once the all clear is given by the National Weather Service, the Building Emergency Coordinator will give the word for employees to return to their workstations or go home.
6.0 Emergency Action Plan - Earthquake

6.1 This section of the BEAP will be implemented when a sustained earthquake occurs.

6.2 Earthquakes occur without warning. Some earthquakes are instantaneous tremors and others are significant sustained events followed by aftershocks. Once a significant earthquake begins, building occupants must take immediate action. Individuals should take emergency action on their own and additional actions will be implemented after the quake stops.

6.3 An earthquake may cause noticeable shaking of the ground and building. This shaking will vary in intensity (i.e., mild tremors to shaking sufficient to destroy buildings.).

6.4 When a significant earthquake occurs, occupants should immediately take cover. Suggested locations inside buildings that provide cover include:

X Standing in a doorway and bracing your hands and feet against each side.
X Getting under a desk or heavy table.
X Standing flat against an interior wall.

NOTE: Do not seek cover under laboratory tables or benches, chemicals could spill and harm personnel.

6.4.1 Procedures for Providing Assistance to Mobility Impaired Individuals When an Emergency Exist and Elevators are Unavailable are found in Appendix C.

6.4.1.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

6.5 Once the shaking has stopped, gather valuables and quickly leave the building. (DO NOT USE ELEVATORS.) Once out of the building, all occupants should gather by department at the following locations to be counted: HSC Bookstore – Front of store on Floyd St. Side, Child and Youth Project – Northeast Corner of Abel Administration Building, School of Nursing – In front of Abel Administration Building, School of Public Health – Northwest corner of Abel Administration Building. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals. The Floor Leaders and/or Building Emergency Coordinator will conduct roll calls to ensure all employees are out of the building.

UofL

Emergency Action Plan
6.6 Be prepared for aftershocks. Although smaller than the main shock, aftershocks cause additional damage and may bring weakened structures down. Aftershocks can occur in the first hours, days, weeks, or even months after the quake. Follow the same procedures as for earthquakes.

6.7 If building occupants can’t be accounted for, the Building Emergency Coordinator may direct personnel to search for the missing people. The Building Emergency Coordinator should contact DPS at 502-852-6111. If DPS does not answer, the BEC should call the local emergency services at 911.

6.8 The Building Emergency Coordinator will determine whether employees should return to their workstations or go home after consultation with the University’s Emergency Coordinator and Department Chairperson.
7.0 Emergency Action Plan - Hazardous Materials

7.1 This section of the BEAP should be implemented in the event of a hazardous material incident that occurs outside of the building, but the chemical could impact the Department (i.e., train derailment, tractor-trailer accident).

7.2 Hazardous material accidents can occur on campus or in the adjacent areas and could impact this building. Local media will broadcast warnings over radio and television to communicate that a hazardous materials incident has occurred. The National Weather Service will broadcast similar warnings over NOAA Weather Radios. Community sirens might sound, notifying people within hearing range to listen to the media. Information Technology may broadcast information over the University's Intranet. Once building occupants become aware of a hazardous material incident that may impact the building, they should notify the Building Emergency Coordinator. The Building Emergency Coordinator will immediately notify employees by either word of mouth, telephone or public address announcement. This notification will advise building occupants to implement the emergency actions.

7.3 The local community uses two strategies for protecting citizens during hazardous material emergencies. The Building Emergency Coordinator will notify the building occupants of which strategy has been implemented.

7.4.1 The first strategy that local government could use is "Shelter in Place". Everyone in the building would be required to stay in the building until the all clear is given. Employees will take the following actions:

X Close all windows and doors
X Turn heating/cooling systems (HVAC) off
X Everyone will move to the (location) shelter in place location
X Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions
X Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals

7.4.2 The Building Emergency Coordinator will ensure that the actions outlined in section 7.4.1 are completed. The Building Emergency Coordinator and/or Floor Leaders will also conduct a roll call to ensure that all personnel are protected.

7.4.3 The Building Emergency Coordinator will monitor the news media or the NOAA Weather Radio for further updates and will advise personnel on any changes in the situation. The Building Emergency Coordinator will also announce the all clear when declared by community officials.
7.4.4 If personnel become ill from the chemical release, the Building Emergency Coordinator or designate should contact DPS at 502-852-6111. If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911.

7.4.5 The Building Emergency Coordinator will direct personnel to open doors and windows and allow the building to air out after the all clear is given. The Building Emergency Coordinator will also direct personnel to reactivate the heating/cooling system (HVAC).

7.4.6 Procedures for providing assistance to mobility impaired individuals when an emergency exist and elevators are unavailable are found in Appendix C.

7.4.6.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

7.5.1 The second strategy that local government could use is "Evacuation". The Building Emergency Coordinator will direct personnel to take appropriate action. This action may include:

- X Walk to an assembly area to be evacuated
- X Walk or drive away from the area using travel directions determined by community officials
- X Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions
- X Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals

7.5.2 The Building Emergency Coordinator will ensure that the actions outlined in section 7.5.1 are completed as directed by community officials. The Building Emergency Coordinator and/or Floor Leaders will also conduct a roll call to ensure that all personnel have evacuated the building.

7.5.3 If personnel become ill from the chemical release, the Building Emergency Coordinator or designate should contact DPS at 502-852-6111. If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911.

7.5.4 Procedures for Providing Assistance to Mobility Impaired Individuals When an Emergency Exist and Elevators are Unavailable are found in Appendix C.

7.5.4.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

*UofL*

*Emergency Action Plan*
7.6 If building occupants cannot be accounted for, the Building Emergency Coordinator should contact DPS at 502-852-6111. If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911.

7.7 The Building Emergency Coordinator will determine whether employees should return to their workstations or go home after consultation with the University's Emergency Coordinator and Department Chairperson.
8.0 Emergency Action Plan - Chemical Emergency

8.1 This section of the BEAP should be implemented in the event that a hazardous material incident occurs inside of the building (laboratory, maintenance or physical plant operation).

8.2 Any person that becomes aware of a serious chemical accident in the building will immediately notify the co-workers around them and their supervisor. Either the person who discovered the chemical accident or the supervisor will immediately notify the BEC. The Building Emergency Coordinator will immediately notify employees by either word of mouth, telephone or public address announcement. This notification will advise building occupants to implement the BEAP for Chemical emergencies.

8.3.1 Personnel that are involved with a laboratory experiment or process should take steps to stop the process or experiment to prevent additional accidents if it is left unattended. These steps are specific to each laboratory and are included in appendix D.

8.3.2 Personnel in the immediate area of the chemical accident will vacate the area and report by department at the following locations to be counted: HSC Bookstore – Front of store on Floyd St. Side, Child and Youth Project – Northeast corner Abel Administration Building, School of Nursing – In front of Abel Administration Building on Chestnut St. side, School of Public Health – Northwest corner of Abel Administration Building. They should leave the area immediately, closing, but not locking, any doors as they leave. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

8.4 The Building Emergency Coordinator will immediately notify DPS (502-852-6111) and/or DEHS (502-852-6670) and report the chemical emergency. The Building Emergency Coordinator will also ensure that the HVAC for the building is shut down (this may require a call to Physical Plant at 502-852-6241), to prevent the spread of chemical gasses through the cooling/heating system.

8.5 If personnel become ill from the chemical release, the Building Emergency Coordinator or designate should contact DPS at 502-852-6111. If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911.

8.6 The Building Emergency Coordinator will determine if further evacuations are necessary.

8.6.1 Procedures for Providing Assistance to Mobility Impaired Individuals When an Emergency Exist and Elevators are Unavailable are found in Appendix C.
8.6.1.1 Special needs by physically disabled faculty or staff shall be made known to the BEC. K Building currently has no faculty or staff with physical disabilities or special needs.

8.7 The Building Emergency Coordinator and/or Floor Leaders will conduct a roll call to ensure that all personnel have evacuated the building.

8.8 The Building Emergency Coordinator will provide information to the DPS officer, the University Emergency Coordinator or the Fire Department Officer in Charge. This information may include, but is not limited to:

X Location of the spill,

X Status of the evacuation, personnel missing that may still be in the building, and Special hazards associated with the building.
9.0 Emergency Action Plan – Natural Gas Leaks

9.1 This section of the BEAP shall be implemented in the event that a natural gas leak occurs inside of the building (laboratory, maintenance or physical plant operation).

9.2. Gas leaks will be divided into two types, large and small. Specific plans will be utilized for each type of leak/release.

**Large gas leak**- a large gas leak will be obvious with the release of gas in large quantities usually producing noise from the leak location and extremely strong odors. In most cases of a large leak, the origin of the release will be obvious, i.e., a malfunctioning valve, or a witnessed breach of a gas line. This type of release would be uncontrolled at the leak location.

**Small gas leak**- can be identified as a gas odor, may be transient, and is smelled by building occupants. Typically, this type of release is from an unknown origin, and is detected only by the smell of gas.

9.3. Large Leaks

9.3.1. Any person that becomes aware of a natural gas leak by either witnessing the leak or if they have a known gas release in the building, they shall immediately notify the co-workers around them, their supervisor and the BEC.

9.3.2. The Building Emergency Coordinator will immediately notify Public Safety (502-852-6111). If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911. The Building Emergency Coordinator will also ensure that the HVAC for the building is shut down (this may require a call to Physical Plant at 502-852-6241), to prevent the spread of natural gas through the cooling/heating system.

9.3.3. The BEC shall order an evacuation of the building by either activating the fire alarm or by word of mouth. Building occupants should leave the area immediately, closing, but not locking, any doors as they leave. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals (see sect. 9.5).

9.3.4. Occupants shall meet in the area identified as the gathering place found in appendix A.

9.3.5. Personnel that are involved with a laboratory experiment or process shall take steps to stop the process or experiment to prevent additional accidents if it is left unattended. These steps are specific to each laboratory and are included in appendix D.

*UofL*

*Emergency Action Plan*
9.3.6. Building occupants **shall NOT** attempt to stop the leak. Physical Plant, Public Safety and Environmental Health and Safety personnel shall then attempt to locate and stop the gas leak. The fire department will respond to the leak as an emergency.

9.4. **Small Leaks**

9.4.1. Any person who becomes aware of a smell that they identify as natural gas (rotten egg smell) shall immediately call Public Safety at (502-852-6111). If DPS does not answer, the Building Emergency Coordinator should call the local emergency services at 911.

9.4.2. Any person who notices a leak shall notify the co-workers in the area and the BEC.

9.4.3. **If it is deemed necessary to evacuate the building by the BEC, DPS, Physical Plant or Fire Department,** personnel in the building shall vacate the building using the preplanned evacuation route (used for fire emergency) and report to the evacuation assembly area designated in Appendix A of the BEAP. They shall leave the area immediately, closing, but not locking, any doors as they leave. Any occupant who comes into contact with a student or visitor shall direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals (see section 9.5).

9.4.4. Personnel that are involved with a laboratory experiment or process shall take steps to stop the process or experiment to prevent additional accidents if it is left unattended. These steps are specific to each laboratory and are included in appendix D.

9.5. **Procedures for Providing Assistance to Mobility Impaired Individuals:** If an evacuation is ordered, and elevators are unavailable, procedures for providing Assistance to Mobility Impaired Individuals should be implemented. These are found in Appendix C. Special needs by physically disabled faculty or staff shall be made known to the BEC whenever possible for preplanning.

9.6 If the building was evacuated, the Building Emergency Coordinator and/or Floor Leaders shall conduct a roll call to ensure that all personnel have evacuated the building.
9.7 The Building Emergency Coordinator shall provide the following information to the Physical Plant, DPS officer, the University Emergency Coordinator and/or the Fire Department Officer in Charge as needed. This information may include, but is not limited to:

- Building name and/or number
- Floor number
- Room number
- Description of leak
10.0 Emergency Action Plan - Utility Interruption

10.1 This section of the BEAP should be implemented in the event of a utility interruption.

10.2 Employees will become aware of utility interruptions by the obvious absence of that particular utility:
   X No Lights, Computers not working - Electric
   X Toilets won't flush, drinking fountains not working - Water
   X Inability to place outgoing telephone calls - Telephone
   X Building won't warm up during winter - Steam or Gas
   X Building won't cool in summer - Electric or chilled water

10.3 The Building Emergency Coordinator, Department Chairperson or other administrative staff should contact Physical Plant (502-852-6241) to report the problem and obtain any available information.

10.4 While a power interruption does not usually cause emergencies within a facility or injuries to its employees, hazards may be created by outages. The Building Emergency Coordinator in conjunction with the Department Chairperson will determine the appropriate course of action. The Building Emergency Coordinator and Department Chairperson should consider the following issues:

   X Dangers from tripping and injuries due to lights being out.
   X Person(s) being trapped on elevators.
   X Dangers of extreme heat and cold on employees.
   X Inability to contact responders if an emergency occurs while telephones are out.
   X Sanitation problems due to no water

10.5 Unless a decision has been made by the Provost, the Building Emergency Coordinator and Department Chairperson will make a decision regarding the continuance of work in the building during a utility interruption. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

10.6 If laboratory research is underway during a utility interruption and the interruption will affect the research, the research should cease until the utility has been restored. Experiments, chemical process and operating electric equipment should be stopped in a manner that would not cause additional problems.

UofL

Emergency Action Plan
10.7 If anyone is trapped on an elevator, immediately call the Department of Public Safety at 502-852-6111, if there is no answer then call the local emergency services at 911.
11.0 Emergency Action Plan - Workplace Violence, Terrorism

11.1 This section of the BEAP should be implemented in the event any type of workplace violence or act of terrorism.

11.2 Building occupants will become aware of a violent act by the sounds of an explosion, gunfire, scuffling, or by observation of events that could only be intentional acts of violence. The person(s) who observe these life-threatening acts should immediately call DPS at 502-852-6111, if there is no answer, call the local police by dialing 911.

11.3 The BEC should attempt to communicate to everyone in the building that a perpetrator of workplace violence is in the building. This will be done by public address announcement and word of mouth.

11.4 Different types of workplace violence require different actions:

11.4.1 Explosion - If an explosion occurs, building occupants should leave the building using the same evacuation plan and procedures as they would for a fire.

11.4.2 Gunfire - If you become aware of gunfire occurring in the building, take refuge in a room that can be locked. The room should also provide limited visibility to anyone that is outside of it. Secure the door and hide under a desk, in a closet or in the corner.

11.4.3 Physical Threat - If someone’s actions pose a physical threat to you, evacuate the area.

11.4.5 Toxic or Irritant Gas - Immediately evacuate the building using the same evacuation plan and procedures as the Fire EAP.

11.4.6.1 Hostage Situation - If you become aware of a hostage situation, immediately vacate the area, take no chances to endanger the life of the hostage. Contact DPS at 502-852-6111 immediately, if no answer, contact local police at 911.

11.4.6.2 If you are taken hostage by a perpetrator take no offensive actions and cooperate. Use your best judgment if the situation deteriorates.

11.5 In the event someone is hurt and/or a fire is caused by these events, contact DPS at 502-852-6111 and advise them of the particular information. If there is no answer at DPS then call 911.

11.6 The BEC, Department Director, UBM and DPS will coordinate the building’s security once DPS releases the building. This group will also contact building occupants and advise them when it is acceptable to return to work.

25

Emergency Action Plan
11.7 The BEC and/or the Department Director will participate in any post-incident critique regarding the emergency.

11.8 Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

11.9 The BEC will contact the University’s Risk Coordinator (502-852-6925) regarding any property damage caused by the incident. The BEC will also contact Physical Plant (502-852-6241) regarding any repairs needed from damage. In the event an employee is injured, normal worker injury reporting procedures should be followed.

11.10 The Department Director will direct that a report be prepared after any workplace violence. This report shall review emergency actions, their effectiveness and needed revisions. This report will be shared with employees and forwarded to DEHS and DPS.
12.0 Emergency Action Plan - Bomb Threat

12.1 This section of the BEAP should be implemented in the event of a Bomb Threat

12.2 A person would become aware of a bomb threat by either a telephone call, E-Mail or a letter. The person shall notify the DPS by calling 502-852-6111.

12.2.1 If the threat is made by telephone, ascertain as much information as possible about the bomb and its location, such as:
   - Exact location of the bomb?
   - When is the bomb going to explode?
   - What kind of bomb is it?
   - Why was it placed?
   - Who is speaking?

   See Appendix E for Bomb Threat Caller Checklist

12.3 The person should then notify his or her supervisor, the BEC and the Department Director as quickly as possible.

12.4 A decision will be made by the BEC, Department Director and DPS to determine if a building evacuation is warranted. If it is warranted, evacuation should take place as outlined in the fire emergencies section.

12.5 Occupants should not touch any suspicious or unfamiliar objects. Occupants should wait for police personnel to arrive on the scene before conducting any type of search.

12.6 The BEC, Department Director, UBM and DPS will coordinate the building’s security once DPS releases the building. This group will also contact building occupants and advise them on when to return to work.

12.7 The BEC and/or the Department Director will participate in any post-incident critique regarding the emergency.

12.8 If an explosion does occur, building occupants should leave the building using the same evacuation plan and procedures as they would for a fire.
13.0 **Emergency Action Plan - Medical Emergency**

13.1 Implement the BEAP for Medical Emergencies for any injury or illness that requires more than simple first aid.

13.2 Immediately contact DPS at 502-852-6111 and report the emergency, if there is no answer, call the local emergency medical services at 911.

13.3 When reporting the medical emergency provide the following information:
- Type of emergency
- Location of the victim
- Condition of the victim
- Any dangerous conditions

13.4 Comfort the victim and try not to move him or her until DPS arrives. DPS are first responders and will provide first aid care until EMS arrives. Individuals trained in first aid or medical professionals, who wish to render aid to the injured or ill person, may provide care as a good Samaritan.

13.5 Have someone standby outside the building to flag down EMS when they reach the vicinity of the building.

13.6 Once the victim has been cared for and is transported, normal worker injury reporting procedures should be followed.
14.0 Actions to take after the Emergency

14.1 Once the emergency is over and the building as been returned to the occupant, the Building Emergency Coordinator and Department Chair will determine if the building occupants should return to work or be released. If they are released, employees will be advised when to return to work.

14.2 The Building Emergency Coordinator, Department Chair, UBM and DPS will coordinate the building's security once the Fire Department releases the building. This group will also contact building occupants and advise them on when to return to work. DEHS will coordinate the mitigation of the spill and notification to governmental agencies.

14.3 The Building Emergency Coordinator and/or the Department Chair will participate in any post-incident critique regarding the emergency.

14.4 The Building Emergency Coordinator will contact the University's Risk Coordinator (502-852-6925) regarding any property damage caused by the chemical spill. The Building Emergency Coordinator will also contact Physical Plant (502-852-6241) regarding any repairs needed from damage caused by the chemical release. In the event an employee is injured, normal worker injury reporting procedures should be followed.

14.5 The Department Chair will direct that a report be prepared after implementing this plan. This report shall review emergency actions, their effectiveness and needed revisions. This report will be shared with employees and forwarded to DEHS and DPS.
15.0 Emergency Action Plan – Active Shooter

15.1 This section of the Building Emergency Action Plan will be implemented in the event of:

- An individual enters a University building to injure its occupants.
- An armed perpetrator is being pursued by the police on or in the area of a University Campus.
- You must take immediate action to protect yourself.

15.2 The only warning you might have is the sound of gunfire, scuffling or other employees yelling a warning.

15.2.1 You must take immediate action.

15.2 In Your Building

15.2.1 If you hear gunfire, scuffling or warnings regarding an active shooter immediately seek refuge in an area that can be locked from the inside. A room without windows would be the best choice. Hide inside that area behind a desk, under a table or in a closet or bathroom. The more heavy furniture and doors between you and the gunman will increase your margin of safety.

15.2.2 Remain still and quiet until the police come to your assistance.

15.2.3 If a phone is immediately available in the area you are using for refuge, and if it is safe to do so, call Public Safety at 502-852-6111 or 911. If it is safe to do so, stay on the phone with the police dispatcher until they hang up.

15.2.4 Take no action to intervene with the perpetrator.

15.3 If you receive an alarm from the UofL Alert emergency notification system

15.3.1 The warning will specify which building the perpetrator has entered. Immediately go into any other building that is closest to you. Move away from outside doors and windows.

15.3.2 Stay inside that building until the police issue an “all clear” message via UofL Alert.

UofL

30

Emergency Action Plan
15.4 If you come face to face with the Shooter

15.1 If you are unable to get into a secured area and the gunman approaches you, your actions will depend solely on your judgment and capability. No strategy is 100% effective. Your options include:

- Remain docile and hope that he does not take specific action against you.
- Attempt to reason with the assailant.
- Escape by running from the area.
- Attack the assailant and try to gain advantage in an attempt to escape.
Appendix A
Fire Evacuation Routes

Proceed to the nearest exit as shown on the following floor plans:
Emergency Action Plan
Fire Evacuation Procedures
FOR CHILDREN AND YOUTH PROJECT.

(a) PROCEDURES FOR REPORTING A FIRE

1. ANYONE who discovers a fire in this building – pull the fire alarm.

2. Public Safety is automatically notified when the fire alarm is activated. Debbie Barksdale will be responsible for notifying Health Science Physical Plant at 502-852-5695 in case of a false report. The alternate will be Laura Brown.

3. When fire alarm is activated an announcement will automatically declare a state of emergency and give instructions to leave the building.

4. Do not attempt to extinguish a fire unless you are sure that you know how to use the equipment. If you do not, let the professionals handle it.

(b) EVACUATION DUE TO FIRE OR FIRE ALARM

1. Assignments have been made for leaders to evacuate the clinic as follows:

Debbie Barksdale
Front entrance & waiting areas, exit through the front entrance. Parents who have children in the dental area should be told that the dental staff will take children out the northwest exit door and will meet in the front of the building.

Kelly Ball
Nutrition, lab, triage and social service areas, exit through the front entrance.

Paula Lutes
Dental area, exit through dental to the northwest door (Floyd Street exit).

Nursing Station #2
Hallway 2 (Rooms 1098, 1099-1110) medical area, exit through the front entrance.

Nursing Station #1
Hallway 1 (Rooms 1042 – 1050, 1053-1066) medical area, exit through the northwest exit (Floyd Street).

Regina Uhl
Hallway 3 (Rooms 1076-1082, 1089-1097), exit through northeast door.

Lee Ann Mingus
Back hallway (Rooms 1065, 1067-1074, 1085-1088), exit through the northeast door.

2. Evacuation shall be made through the nearest emergency exit as quickly and quietly as possible. Make sure all doors in your area are closed but not locked.

3. The building will not be re-entered until either the Fire Department or the Public Safety issue’s the ALL

Emergency Action Plan
Appendix B
Severe Weather Shelter Places

Do not use main stairwell to get to the severe weather shelter (plate glass could be broken and become hazardous). Use of back stairs, and elevator should be used. Bookstore will shelter in their back stockroom. C&Y Clinic shall follow procedures outlined later in this plan. Personnel on the second, third and fourth floors shall proceed to the second floor and seek shelter in the illustrated areas:

Emergency Action Plan

EMERGENCY AND DISASTER PLAN FOR CHILDREN AND YOUTH PROJECT.

PROCEDURES FOR TORNADO

Once employees and visitors have been notified of a tornado warning, they should gather their valuables and take cover. Any employee who comes into contact with a visitor should direct them to take appropriate actions. Any employee that comes into contact with a visitor that is physically disabled should assist those individuals. Office doors should be closed upon exiting.

1. Assignments have been made for leaders to gather all personnel and patients to the clinic areas as follows:

   Debbie Barksdale Direct all personnel in medical records and visitors from the waiting areas to triage (room 1017) or the center hall in the clinic area.

   Kelly Ball Direct all employees and visitors in nutrition, lab, triage and social service areas to triage (room 1017) or the center hall in the clinic area.

   Paula Lutes Direct all employees and visitors in dental area to center hall in the clinic area or the conference room (room 1087).

   Nursing Station #2 Direct all employees and visitors in hallway #2 medical area (rooms 1098, 1099-1110) to stay in exam rooms, center hall in clinic area or conference room (room 1087).

   Nursing Station #1 Direct all employees and visitors in hallway #1 medical area (rooms 1042 – 1050, 1053 -1066) to center hall in clinic area or conference room (room 1087).

   Regina Uhl Direct all employees and visitors in hallway #3 (rooms 1076 -1082, 1089 - 1097) to conference room (room 1087).

   Lee Ann Mingus Direct all employees and visitors in back hallway (rooms 1065, 1067-1074, 1085-1088) to conference room (room 1087).

The Building Emergency Coordinator, once the National Weather Service gives the all clear, will give the word for employees and visitors to return to their workstations or go home.

Appendix C

Procedures for Providing Assistance to Mobility Impaired Individuals When an Emergency Exist and Elevators are Unavailable

This procedure has been developed to provide assistance to mobility impaired individuals when an emergency occurs and the elevator is unavailable. This procedure should also be used in cases where a mobility impaired individual is on the upper floors of a building and the elevator(s) for that building become inoperative.

1.0 Call for Service

1.1 In the event an emergency occurs within a multi-story building, building occupants should be aware that individuals with mobility impairment might be on upper floors of the building. Faculty members should be particularly aware of students that are mobility impaired. Faculty, Staff and/or students should be prepared to assist individuals with mobility impairments.

1.2 When someone (faculty, staff or student) becomes aware of mobility impaired individual needing assistance to move to the ground floor of a building, when the elevator is unavailable, he or she should immediately call 502-852-6111 and advise the dispatcher regarding the need for services. The caller should provide the following information:
   - Location of the individual
   - Type of emergency
   - Any other information requested by the dispatcher

1.3 The dispatcher will provide directions to the caller of actions to take until assistance arrives.

2.0 Dispatcher Actions

2.1 The dispatcher will receive calls requesting assistance for mobility impaired individuals needing to leave a building, but unable to due to an elevator failure. The dispatcher will obtain all available information. Then dispatcher will then determine if the response is an emergency or non-emergency.
2.2 The dispatcher will advise the caller regarding actions they should take until responders arrive on the scene. Suggested actions are listed below:

- Move the mobility impaired individual into an area of safety
  Fire- into an office or room that has a window, close the door and await assistance.
  Tornado- Into an interior room without windows, close the door and await assistance.
- Advise the caller whether they should wait with the impaired individual or evacuate the building.
- Caller not to block the fire exits with the mobility impaired individual.

2.3 Emergency Response

2.3.1 The dispatcher will contact an on-duty unit and dispatch them to respond to the DPS office and pick-up the portable stair chair. The response to the office will be made on an emergency basis. Once the officer has picked up the chair, the response to the scene will again be on an emergency basis.

2.3.2 If a patrol unit is not available, a Parking Services Officer will be dispatched to the office to pick up the stair chair. The Parking Services Officer should respond directly, but he or she should drive in accordance to the Kentucky Revised Statutes.

2.3.3 The dispatcher should contact the Physical Plant Work Control Center and ask them to send 1 or 2 people to the location of the emergency
          
or
The DPS dispatcher should dispatch Physical Plant workers directly if they know what personnel are working in the zone covering the area of the emergency. Physical Plant staff should respond directly, but he or she should drive in accordance to the Kentucky Revised Statutes.

2.3.4 The Dispatcher should page the DEHS ERT and enter a message regarding the emergency into their pagers requesting assistance. DEHS staff should respond directly, but he or she should drive in accordance to the Kentucky Revised Statutes.

2.4 Non-Emergency

2.4.1 The same procedures as outlined in section 2.3 should be used with the exception that the on-duty would respond in a non-emergency mode; and DEHS would not respond.

2.5 In the event that units cannot be dispatched to the emergency, notify the Louisville Fire

*UofL*

*Emergency Action Plan*

*ix Building*

*August, 2008*
3.0 Emergency Actions at the Scene

3.1 Using the stair chair obtained from the DPS office, transfer the mobility-impaired individual from their wheelchair, onto the stair chair. After the mobile occupants of the building have cleared the stairwells, using at least three individuals, transport the individual to the ground floor and out of the building.

3.2 Remove the mobility-impaired individual from the stair chair and place them in a position of comfort in an area of safety. If the weather is adverse, they should be moved to another building.

3.3 Once the emergency is over, recover the mobility impaired individual’s wheel chair and transport it to the ground floor and then to the location of the individual. Transfer the individual back to their own wheel chair.

4.0 Training

4.1 DPS, Parking Service, Physical Plant and DEHS personnel will receive training in moving mobility-impaired individuals. Personnel not trained in these methods should provide assistance under guidance of someone who has received the training.

NOTE: This procedure is not intended to move anyone into a building, but only to leave the building in an emergency or in the event of elevator failure.
