

Black Death

THE PANDEMIC THAT CHANGED HUMAN HISTORY

featuring

DR. FABIAN CRESPO

UNIVERSITY OF LOUISVILLE

Associate Professor
of Anthropology

The Black Death pandemic in the 14th century decimated Europe, killing an estimated 30-50% of the population. However, not everyone was exposed to the pathogen, and not everyone who was exposed died during the outbreak. University of Louisville anthropology professor Dr. Fabian Crespo will use a syndemic approach to examine the Black Death across different disciplines such as immunology, bioarcheology, and history to generate new lessons for understanding epidemics, and the long lasting effect the Black Death had on history.

THURSDAY, MARCH 7, 6:30 P.M.

MAIN LIBRARY • 301 YORK STREET

This class is free and open to the public,
but **registration is requested.**

Call (502) 574-1623 to reserve your spot.
