

EPA ID: KYD980559520 Site Name: BLACK LEAF CHEMICALS

State ID:

Alias Site Names: BLACK LEAF CHEMICALS

City: LOUISVILLE

Refer to Report Dated: 9/27/2011

County or Parish: JEFFERSON

State: KY

Report Developed By: STATE

Report Type: SITE INSPECTION 001

1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:  
 NFRAP-Site does not qualify for the NPL based on existing information

2. Further Assessment Needed Under CERCLA:

**Discussion/Rationale:**

The U.S. Environmental Protection Agency (EPA) has determined that no further remedial action by the Federal Superfund program is warranted at the referenced site, at this time. The basis for the no further remedial action planned (NFRAP) determination is provided in the attached document. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the site unless new information warranting further Superfund consideration or conditions not previously known to EPA regarding the site are disclosed. In accordance with EPA's decision regarding the tracking of NFRAP sites, the referenced site may be removed from the CERCLIS database and placed in a separate archival database as a historical record if no further Superfund interest is warranted. Archived sites may be returned to the CERCLIS site inventory if new information necessitating further Superfund consideration is discovered.

While contaminants have been detected above screening levels in on-site soils, the soil pathway does not warrant further remedial investigation under the HRS. The site is currently being evaluated by EPA's Emergency Response and Removal Branch (ERRB), and nearby residential soils will be assessed during the ERRB investigation.
