

This project needs an appropriate name. This is *NOT* an effort to rename a neighborhood or district. We need a better name for the *planning process* and the resulting *plan* that more accurately reflects the study area. Here are some questions to help us brainstorm.

1. What are four words you think should be included in the name?
2. Do you refer to the rail corridor in the study area by a specific name?
3. Do you ever refer to Beargrass Creek or this section of it by any other name?
4. Do the streets that run approximately parallel to the rail line in this area hold any symbolic or historic meaning? i. e. Swan, Logan, Meriwether?
