### NIEHS Opportunities

The NIEHS Division of Extramural Research and Training wants to bring to your attention our Administrative Supplement for Summer Research Experiences for Students and Science Teachers. If you have good candidates to bring into the lab during the summer for a project, please see the following [LINK](#). This program supports summer research experiences in the environmental health sciences for high school students; college undergraduates; master's degree candidates; medical students; secondary school science teachers; and science professors from community, junior, or technical colleges as well as primarily undergraduate institutions. These supplements are intended to introduce students and teachers to research in the environmental health sciences that would not otherwise be available to them through their regular course of study. We encourage CIEHS members to apply!
