

UofL Engaged Scholarship Symposium
March 7, 2019

**CONN CENTER FOR
RENEWABLE ENERGY RESEARCH**

**Youth outreach on renewable energy
and sustainability themes**

Conn Center conducts R&D on renewable energy and energy efficiency technologies.

We work on solar cells, batteries, biofuels & biomass conversions, solar fuels, energy efficiency, and engineered nanomaterials for next generation energy devices.

The Center advances innovations from our labs to commercial readiness.

The Center employs top-notch scientists and engineers to direct this research and enable collaborations with faculty, researchers and industry partners.

One of the center's strategies goals is **to engage the community through outreach.**
