

Positive Case Procedures

1

- Individual who tested positive directed to start isolation
- Call CHS to initiate icontact investigation
- CHS confirms positive diagnostic test results
- CHS initiates contact investigation and develops contact list

2

- CHS notifies contacts via phone or email that they have been exposed and to start self-isolation x 14 days
- Exposed are only tested if they become symptomatic. No immediate testing is necessary if asymptomatic.
- Most symptoms appear in 2-5 day but may take up to 14 days to appear

3

- CHS helps unit coordinate response when indicated.
- CHS provides testing for anyone who develops symptoms during isolation
- CHS provides return-to-class certificate at end of 14-day quarantine for those exposed who do not develop symptoms or 10 day isolation period who are determined to be positive.
