Cardinal Faculty and Staff,

The university’s drive-through vaccination site in Cardinal Stadium will open **Thursday, April 8**, for all university employees, including students on university payroll, with vaccination appointments. Read below for details about the Cardinal Stadium drive-through vaccination site, reminders about the vaccine and what to expect next.

**What to know about the Cardinal Stadium site**

- For the first two days, **April 8 and 9**, UofL Health will reserve Cardinal Stadium’s Purple Lot exclusively for university employees with vaccination appointments. Starting April 12, the site will serve both university employees and members of the public.
- This high-volume, drive-through vaccination site will have 24 lanes to accommodate the thousands of vaccinations UofL Health plans to administer each day. Although it is preferred for the drive-through format of this site, you do not have to be in a vehicle to receive your scheduled vaccination.
- At this time, we anticipate this site will be administering the one-dose, Johnson & Johnson vaccine. UofL Health must work with the vaccine it is given from the state, so it is possible that the type of vaccine available at this site may change in the future.

**Reminders about the vaccine**

- If you have already begun a two-dose vaccination with UofL Health’s Brook Street site or any non-UofL vaccination site (such as Walgreens or CVS), you should keep those appointments.
- Even after you are fully vaccinated, masking and physical distancing of at least 6 feet are still required on campus.
- We will inform the university community when changes to our health protocols and testing program may take place.

**What to expect next**

- Next week, all employees and students on payroll will receive a vaccine invitation from the Student Health Services email account (hlthoff@louisville.edu).
- That invitation will contain a form for you to confirm if you would like to be scheduled for the vaccine and to indicate your availability. Even if you have been vaccinated or do not wish to be vaccinated at this time, please indicate that on the form.
- If you indicate on the form that you wish to be scheduled for the vaccine, you will receive notification of your vaccine appointment time from UofL Health’s Acuity scheduling system (@acuity.com) with the appointment details.

Thank you for your continued cooperation and perseverance through this difficult, yet improving, journey of battling the pandemic.
