Cardinal Students,

We are pleased to share with you that UofL Health will open the state’s largest drive-through COVID-19 vaccination site at Cardinal Stadium’s Purple Lot next week.

UofL Health is moving quickly through the remaining phases of the state's vaccine roll-out plan. In accordance with that plan, UofL Health will first vaccinate university employees and students on payroll on April 8 and 9 at this site. Then, they will begin vaccinating university students on April 12, along with members of the public. Read below for more details.

Cardinal Stadium Purple Lot vaccination site
This high-volume, drive-through vaccination site will have 24 lanes to accommodate the thousands of vaccinations UofL Health plans to administer each day.

- Although it is preferred for the drive-through format of this site, you do not have to be in a vehicle to receive your scheduled vaccination.
- At this time, we anticipate this site will be administering the one-dose Johnson & Johnson vaccine. UofL Health must work with the vaccine they are given from the state, so it is possible that the type of vaccine available at this site may change in the future.

What to expect next
This week, if you are on university payroll, you will receive a vaccine invitation from the Student Health Services email account (hlthoff@louisville.edu). If you are not on university payroll, you will receive a student vaccine invitation next week.

- The invitation will contain a form for you to confirm if you would like to be scheduled for the vaccine and to indicate your availability. Even if you have been vaccinated or do not wish to be vaccinated at this time, please indicate that on the form.
- If you indicate that you wish to be scheduled for the vaccine, you will receive notification of your vaccine appointment time from UofL Health’s Acuity scheduling system (@acuity.com) with the appointment details.

Reminders about the vaccine
- If you have already begun a two-dose vaccination with UofL Health’s Brook Street site or any non-UofL vaccination site (such as Walgreens or CVS), you should keep those appointments.
- Even after you are fully vaccinated, masking and physical distancing of at least 6 feet are still required on campus.
- We will inform the university community when changes to our health protocols and testing program may take place.
Thank you for your continued cooperation and perseverance through this difficult, yet improving, journey of battling the pandemic.
