Subject: Will you continue to function as a **Coordinating Committee for the Fall Pivot?**

I am hoping that you will all agree to serve as the coordinating committee for the "Pivot to Fall" scenario planning groups. Yesterday, I charged a group of associate deans and faculty that Beth W and I will chair with planning for the delivery of academic programs. I know Michael Mardis has started meeting with housing and dining folks for the student services piece, and I'd like Phil and Kevin to continue working with their people on the health and safety issue surrounding a restart: Mark Watkins will also join us to oversee operational issues, Rehan Khan will be added to oversee IT.

I have participated in an ACC meeting of the provosts regarding starting the semester again, and concerns range from ensuring social distancing while opening up research labs, academic delivery of academic programs, "creative calendaring," population-based interventions as well as focused, case-based interventions for those with added risk to address faculty and staff concerns about returning to campus. I will provide a list of concerns from various groups I meet with to our cardbox.

I'll be forwarding in a minute the letter Karen sent from me to the academic planning group, along with the two attachments. I'm also **collecting items** for a CardBox for us, most of which came from the Chronicle. **If you have others, please send them to Karen and she will make sure they get added.**

Thanks.

Best, Beth
