

**UNIVERSITY OF LOUISVILLE
SCHOOL OF DENTISTRY**

Prepaid Weekly Sterilizer Monitoring Program

DESCRIPTION OF SERVICES:

We will supply the practice with sufficient materials for effective monitoring of dental office sterilizers on a weekly schedule. The supplies include spore strips that have an FDA 510-K approval, preaddressed return mailers, and postage. In addition, we provide a certificate of participation suitable for framing and patient information. We send written data sheets upon request to verify the results. In case of nonsterile samples, we call immediately upon detection of the problem. Our normal routine is to send supplies in batches of 20 so that the practice will always have samples that are fresh. Our laboratory runs internal controls daily to verify the quality of the spore strips.

Call us to request additional supplies or ask questions: **(502) 852-1296**.

COST:

The cost is **\$225.00 for a single office sterilizer** (autoclave, dry-heat, or chemiclave) **per year of service**. If you have multiple units in the same office we charge **\$200.00 for each additional unit**. These fees cover all monitoring services for a one (1) year period. There is no charge for a resupply of samples within the year.

Please enroll the following practice/business in the University of Louisville School of Dentistry **Sterilizer Monitoring Program**. I understand that service will begin immediately upon receipt of payment. Payment can be in the form of a check or credit card. UofL honors Visa, MasterCard, Discover and American Express. Make checks payable to **UofL Monitoring Service**.
