

Observations of Classes Taught by Dual Credit Instructors

Purpose

The primary goal of observing instructors teaching in the Teaching and Learning Pathway/Dual Credit is to support all instructors in developing more effective teaching strategies. The observation process should be a constructive dialogue between the observer and the instructor being observed.

The secondary goal of the observation of instructors is to fulfill accreditation requirements about evaluations of non-tenure-line teaching faculty. Observation reports, along with student evaluations and course syllabi, will be kept on file in the CEHD Dean's Office for this purpose.
