# HTML Filter settings

Plone filters HTML tags that are considered security risks. Be aware of the implications before making changes below. By default only tags defined in XHTML are permitted. In particular, to allow 'embed' as a tag you must both remove it from 'Nasty tags' and add it to 'Custom tags'. Although the form will update immediately to show any changes you make, your changes are not saved until you press the 'Save' button.

- [Tags](#)
- [Attributes](#)
- [Styles](#)

**Nasty tags** These tags, and their content are completely blocked when a page is saved or rendered.

<input type="checkbox"/>	<input type="text" value="meta"/>
<input type="checkbox"/>	<input type="text" value="object"/>
<input type="button" value="Remove selected items"/> <input type="button" value="Add Nasty tags"/>	

**Stripped tags** These tags are stripped when saving or rendering, but any content is preserved.
