The University of Louisville Autism Center and the Kentucky Autism Training Center have partnered to develop a series of workshops for families affected by autism. The purpose of these workshops is to aid families in understanding how to navigate the many systems and programs that may be helpful for their child. The series will be especially pertinent and helpful for families with children over the age of 14, but everyone is invited and encouraged to come and participate! Feel free to share this flyer with other families who might be interested!

For additional resources, please visit the Kentucky Autism Training Center's website:
