It's time to change how we view a child's growth.

Kentucky "Learn the Signs. Act Early."

For more information call: 502.852.7799 • <https://louisville.edu/education/kyautismtraining/actearly>

Seek early intervention, if your child is under age 3, contact the First Steps Program at (800) 442-0087.

Contact your local school district's special education department, if your child is age 3 or older to secure special education services your child is entitled to under the Individuals with Disabilities Education Act (IDEA).

It's natural to measure your child's height and weight. But you should measure other ways your child is growing, too. Talk with a doctor or nurse about your child's total development.
