

TO: Faculty Senate

FROM: Christopher Tillquist, representative to the Sustainability Council

DATE: Wednesday, November 6<sup>th</sup>, 2024

SUBJECT: October Sustainability Council meeting held November 6<sup>th</sup>, 2024

Sadly, there was no sharing of “one green thing” at the beginning of the meeting. The primary focus of the meeting was a report on the potential consequences of [TARC2025](#) for bus ridership in Louisville. TARC has insufficient funding from the city to maintain its current schedule, and choices must be made. Basically, TARC can either serve fewer potential riders more frequently but with fewer routes, or serve more potential riders with more routes but less frequent service. I encourage you to review the options on the website linked above. Unless additional funding is found, there will be an impact on UofL students, staff, and faculty.
