The Academic Programs Committee (APC) met on 5/24 with the Senate Planning and Budget Committee to review/discuss one program proposal (Speed: MS in Bioengineering) and one center proposal (Business: Center for Character-Based Leadership).

Proponents of both programs also attended the meeting and P&B/APC followed up with questions and revision suggestions via email. Neither proposal is ready for committee recommendation to the full body for the 6/6/18 meeting.

The two committees also continued our discussion of academic program closure procedures with the goal of summarizing/recommending Senate review procedures at the June 27 meeting.
