

University of Louisville

IT Overview

April 30, 2024

Karlis Kaugars, VP of IT / CIO

- Thank You!
- Listening Tour Progressing
 - Meeting with Deans, VP's and Tech Staff
 - Hoping to meet with unit Staff over the coming months
- Initial Thoughts
 - We are well positioned to accelerate IT contributions
 - We appear to have a good set of “best of breed” tools deployed
 - We do not have them appropriately integrated
 - We have not always fully leveraged their features
 - We need to improve the overall user experience

What Happens Next

- Developing a “One IT” plan
 - That values digital equity across all units
 - That promotes a seamless user experience
 - That embraces a “There is only us” perspective
 - That is aligned and in support of the UofL plan
- Other significant items
 - Continued collaboration on Research Computing
 - Reinvigorating IT governance, including the ATC
 - Revamping IT onboarding, access and identity management
 - Reducing the IT risk profile at UofL – DR recovery, BC planning
 - Moving away from H and I drives
