

January 10, 2022, **ITS**

will begin the use of

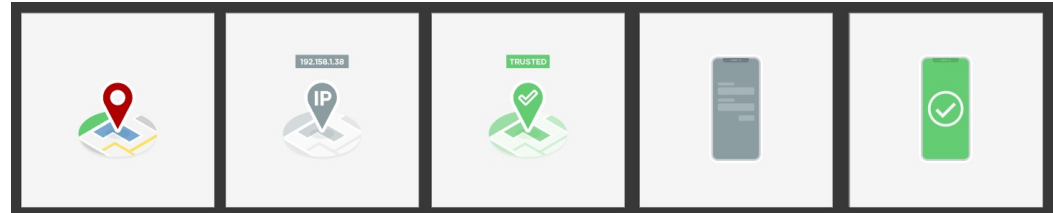

**Conditional Access** for

single-sign-on entry into most

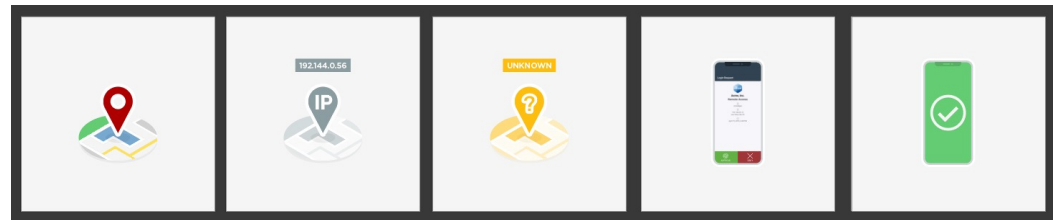

systems. Authorization is

based on a combination of:

- **user and device identity**
  - **location signaling**
- and if necessary,
- **two-factor user verification (Duo)**

**Recognized Location + Recognized Device = Access**

**Unknown Location + UL2FCTR (Duo) = Access**

**Unknown Device + UL2FCTR (Duo) = Access**
