OVERVIEW

TIMEFRAME: It is time for units and departments to become actively involved in the detailed preparation of next year's annual budget—the Fiscal Year 2014-15 (FY15) Operating Budget. The first step is to agree on the beginning amounts—or base budgets. This “**Base Budget Reconciliation (BBR)**” begins now and will conclude on **Friday, January 31, 2014**.

DEFINITION: The BBR is the process of reconciling the unit's FY15 general fund budget, adjusted for approved permanent changes made to the unit's budget as documented by the Office of Budget and Financial Planning (BFP). Specifically, it is obtaining and documenting agreement between unit and BFP records, and the computerized Budget Preparation System (BPS).

The BBR is performed at the program, CSD (College, School, Division), and University-wide levels. **[A listing of CSD names and codes is in Appendix D.]** This step is necessary so that both the units and BFP are beginning the development of the FY15 budget using the same general fund base.

PURPOSE: This reconciliation is the starting point for developing the electronic BPS a detailed line item budget for each unit for the next fiscal year. When the operating budget is completed and approved by the Board of Trustees in May, it will represent a statement of the University's and its component units' financial spending plans for the upcoming year. The budget will serve as a basis for management control and fiscal accountability.

RESOURCE PERSONS: To coordinate the budget development process, each dean and vice president has identified a person within his or her office to act as liaison between the unit and BFP. These individuals (Unit Budget Coordinators - UBC) will be asked to coordinate the flow of information, disseminate budget work papers, and oversee reconciling the base budget. **A list of UBCs appears in Appendix E. Inquiries from departments relating to particular budget problems should be addressed directly to their respective UBC.**

BFP will channel all inquiries and formal communications to and through these UBC during the budget development cycle. Questions relating to the BPS and other technical matters may be addressed directly to your Policy and Budget Analyst. **A list of unit assignments by analyst is provided in Appendix F.**

CONDITIONS: The base budget estimates for each program are the base—or building blocks—upon which the following year's budget is developed. However, **they should not be construed at this time as an approved allocation or a firm commitment of University general funds.** Further changes may be made to budgets during the budget development cycle as the Kentucky General Assembly, the Council on Postsecondary Education and the University's leadership team makes important policy and resource decisions over the coming months.

ALL FUNDING SOURCES: While units are only required to reconcile the general fund program base budget, it is **essential that units also review and update their non-general fund budgets during this process**. Clinics, Academic Program Support, Endowments, and Athletic programs are key examples of programs that must be reviewed for structural balance.

Clinic (Cxxxx) and Academic Program Support (Pxxxx) budgets—jointly referred to as “Clinic Budgets”—will again be fully incorporated into this year’s budget development cycle and loaded on July 1st into the PeopleSoft Financial System from the BPS. Units will begin clinic budget development in January, and the completed financial plans (proposed budgets for both revenue and expenses) are to be submitted to the Executive Vice President for Health Affairs in February. Unless the unit is granted an exception by BFP, clinic budgets will be balanced—expenses equal to the forecast revenue plus any projected year-end carryover. Necessary revisions will be coordinated during the clinic budget review and approval process over the following weeks with final clinic budgets projected to be available by the end of March.

Endowment (Exxxx) Endowment information is tentatively scheduled to be distributed to units electronically in March. Budget Coordinators will complete the applicable forms and work with BFP to adjust their endowment budgets in the BPS.

As in prior years, the University of Louisville **Athletic Association** (ULAA) will participate in the University’s budget development process. ULAA staff will ensure that the revenue and expenditures reflected in the BPS are in agreement with the approved ULAA budget. Once the revenue and expenditure budgets are balanced and approved by the ULAA Board of Directors, the budget will be loaded into the University’s financial system via the BPS.

INSTRUCTIONS FOR SUBMITTING THE 2014-15 BBR

General

The BBR process was revamped to reconcile the general fund base budget. The Base Budget Estimate and Reconciliation sheets were replaced with a Budget Development Balancing Report Less Fringe (BDBRLF) in University Reports. **(See Appendix A)**

The BDBRLF compares the adopted FY 2013-14 budget (less fringe benefits with salary credits) plus/minus approved Continuing Annual Requirement (CAR) adjustments to the current data in the BPS with salary credits. CAR adjustments approved through November 30, 2013 are included in the BDBRLF. **No** CAR adjustments, however, have been entered into the BPS; units must enter their own approved CAR adjustments and then explain any variances by CSD. At the end of the reconciliation process, program balances must agree with the amounts in the budget system.

The BDBRLF is due to BFP by Friday, January 31, 2014. If you have any issues or concerns while reconciling, please contact your Policy and Budget Analyst.

Units **will have access** to the Budget Panels in the BPS. However, no access will be granted to the system until the employee has attended a BPS training session (held on January 13, 2014).

Instructions

The following information and guidelines should be used to input the line item details for this BBR.

1. Run the 2014-15 Detail Departmental Report (DDR) – located in PeopleSoft Financials_U of L_Budget_Panels_Reports_Detail Departmental Expend.
 - a. Includes approved 2013-14 Operating Budget and salary credits
 - b. Excludes Fringe Benefits
2. Run BDBRLF
 - a. University Reports – Department Planning
 - i. Use either department number or use * as wildcard
 - ii. Use CSD or * as wildcard
 - iii. Use by General Funds
3. Compare BDBRLF BPS program totals to the DDR program totals
 - a. Make sure totals on DDR & BDBRLF agree
 - i. If there are any discrepancies, identify the issue(s), then contact your budget analyst.
4. Enter any approved CAR adjustments in the BPS (BPS) located in PeopleSoft Financials_UofL Budget Panels
 - a. Position and Current Expense panels should reflect Fiscal Year 2015, Last Upd (updated) on 10-29-13
5. Re-run the BDBRLF report by CSD to verify user changes to BPS
 - a. If additional corrections are needed in BPS, repeat Step 4
 - b. Otherwise, go to Step 6
6. Export the BDBRLF to Excel
 - a. If the CSD bottom line changes
 - i. Add a variance explanation column to the report
 - ii. Explain any change(s) to the CSD

7. Make sure the BPS totals on the BDBRLF agrees with the DDR
8. Attach your BDBRLF by CSD or Department in an email and submit to your Policy and Budget Analyst
9. Great news, you're done!

No Organizational Changes Are To Be Included

The BBR is to ensure that units, the Office of Budget and Financial Planning and the BPS are all synchronized at the same starting point—for development of next year's budget. As such, planned organizational changes **should not be addressed in this reconciliation**. Changes in organizational structure will be input during the budget development process after the base budget is reconciled (usually in early March).

Also, **Hospital program (Hxxxx)** expenses are funded by specific revenue from hospital operations. Hxxxx programs must be reconciled in the aggregate to the July 1, 2013 Hospital revenue budget. No other changes should be made in Hxxxx program budgets until after completion of the BBR. Hxxxx program changes will then be documented by Budget Revision Request/Budget Change Orders (BRR/BCO) to ensure that the Hospital revenue and expense projections remain balanced.

Similarly, "**program budgets**" —those specifically funded by program generated revenue—(1xxxx, 4xxxx, Cxxxx, Exxxx, Pxxxx and Sxxxx program types) should not address organizational changes or adjustments in the level of projected operating activity. Such changes will be addressed separately from the BBR as part of the program budget development/approval process.

Finally, other than reconciling approved changes that have occurred since July 1, 2013, **no other changes affecting the bottom line of your unit's expense budget should be input at this time.** If there is a question about whether to include a change in this BBR, please contact your BFP Policy and Budget Analyst for clarification.

Budget Reconciliation – General Funds

BUDGET PREPARATION SYSTEM

Each University department or budgetary unit is required to prepare a detailed line item budget in the BPS. The information required of each department is quite detailed and necessitates close attention on the part of those preparing the budget. Special care in preparing the budget and entering budget information into the system will greatly reduce the chances of unnecessary error.

Input Pages – BPS

The BPS is an on-line system designed to reduce the time required to prepare budget information and transfer the information from units to BFP. The on-line aspect of this process provides menu driven access to pages which display information about a position or line item contained in the budget. The **Positions** page displays attributes and financial information about a position. The **Current Expenses** page displays information about a single operating expense item. These pages allow for modifications of the information, the addition of new positions or items, the deletion of a position or item, and changes in the funding source(s) for the position or item.

Layouts of the input pages and instructions for their use are documented in the BPS Training Manual 2014-15. All UBM's are required to attend one of the budget system training sessions on January 13, 2014 before system access is granted.

A unique line number identifies budget lines within a program. These numbers are automatically generated at the time the record is created and cannot be changed. The budget line number is the key for referencing a particular budget line in the BPS.

Each time a new budget line is created or a change is made to an existing line, a Reason Code must be entered. **A table of all permissible reason codes is shown in Appendix G.**

Salary and Wage Guidelines

The position budget panels in the base budget consist of salaries and wages for all University employees using data that was loaded from the 2013-14 budget. Any changes (reclassifications, promotions, etc.) since July 1, 2013 must be reconciled to this adjusted budget figure.

Since data will be directly loaded into the Position Management system at the conclusion of the budget development cycle, it is imperative that salary amounts and funding sources be correct and that other related data elements contained in the BPS are accurate. Carefully review all of the data elements in each budget line.

Use the following guidelines in preparing the budget submission for the various salary types:

1. Faculty Salary Line Items - For purposes of this submission, all faculty positions will be budgeted using *adjusted* July 1, 2013 salary amounts. **Each term faculty position should be entered as a separate budget line and not included in lump sum budget lines.** Projected FY15 salary increases, including anticipated faculty promotions, will not be entered at this time. The source(s) of funds anticipated for each faculty position as of July 1, 2014 should be shown in the Budget Position Funding Data section. For example, if the projected funding source(s) supporting a faculty position differs from that shown in BPS, change the Budget Position Funding Data for that budget line to show the expected

source of funding for FY15. Similarly, all other data elements - except salary amount – that relate to a faculty position should be shown as they will exist on July 1, 2014.

2. Staff Salary and Wage Line Items - Staff positions will also be budgeted using *adjusted* July 1, 2013 wage and salary amounts. Projected FY15 wage and salary increases for next fiscal year, including anticipated promotions or position reclassifications, will not be entered for this submission. The source(s) of funds anticipated for each staff position as of July 1, 2014 should be shown in the Budget Position Funding Data section. If the projected funding for a staff position differs from that shown in the BPS, make changes to reflect the actual source of funds projected for FY15. All other data elements (except salary amounts) relating to staff positions should be shown as they will exist on July 1, 2014.
3. Administrator Salary Line Items - Board-appointed "Administrator" positions are to be budgeted using the same procedures as directed above for faculty and staff positions.
4. All Other Personal Service Line Items – For this BBR, all other personal service items will be budgeted at current FY13 levels.

Current Expense Guidelines (Supplies, Operating Expenses, Travel, and Capital Outlay)

The base budget consists of all Current Expenses using an adjusted July 1, 2013 budget. Any CAR changes since July 1st must be reconciled to this adjusted budget figure. No further re-budgeting between programs or between current expense categories (account codes) should be done until **after** the base budget is reconciled.

Personal Service Budgeting

Personal service budgets include two types of budget line items: individual positions and lump sum positions. Both types of budget lines are entered on the Positions page. By far, most of the budget lines you will deal with are individual positions. University budget policy restricts the use of lump sums.

The data element **Full-Time Annual Salary Rate (FTASR)** is in the “Budget Position Data” section on the Position page. The FTASR represents the annualized salary amount for a full-time equivalent (FTE) position. It is used to calculate an FTE. The FTE for a position may not exceed 1.0.

- For many positions, the individual filling the position will receive a salary from that position only and the funding for that salary will come from one source. In those instances, the FTASR will be the single salary amount.
- In some cases, the funding for that salary will come from more than one source. In such

cases, the FTASR will be the sum of the amounts from all funding sources for the position.

- An individual may be employed in more than one position and receive salaries from each position. In that event, the FTASR is the sum of salaries received from all positions and all funding sources. Search on the Positions Page using the “EmplID” field to identify all the lines budgeted for such an individual.

The “Budget Position Data” section displays the **Pay Grade** for the budgeted position and the minimum and maximum pay rates for that grade. This feature should help in identifying persons who exceed the maximum rate for that grade and will need to have a one-time X-Pay entered later in the budget cycle when merit amounts are input.

The **Job Code** number, as assigned by University Human Resources, is also in the “Budget Position Data” section on the Position page. This code is used to derive the official position title. To change a position title, change the job code. [View a current listing of job codes with the associated pay grade.](#)

The **Position Control Number** (PCN) in the “Budget Position Data” section is a unique eight-digit number assigned to a specific position at the University in conjunction with the person filling that position.

The **Contract Type** field allows designation of the basis on which the individual is paid. This field has a drop-down box to select the appropriate category.

The **Standard Hours** figure is the number of hours a classified employee typically is scheduled to work each week. The Standard Hours figure is either 37.5 or 40. Standard Hours is used in calculating the FTASR amount for classified staff for a given fiscal year.

The **Tenure Eligible** and **Tenure Date** codes are two pieces of information unique to **faculty positions**. If codes and dates are already entered, please check them for accuracy and make any corrections.

The first field, “**Tenure Eligible**,” is for recording tenure status. Use the field’s drop-down box to select the appropriate status. Should there be a change in the tenure status of a faculty member, use the most recent status. While deans are considered administrators, show their respective faculty tenure information in the position record. The tenure status of other administrators with faculty rank should also be identified.

The second field records the “**Tenure Date**.” For tenured faculty, indicate the date that the incumbent of the position was awarded tenure. For positions eligible for tenure, indicate the date that the incumbent of the position is expected to receive tenure. The calendar icon to the right of the field allows easy entry of the date.

The following applies to amending wages and salaries of employees using the Budget Positions panel of the BPS:

- Check every budgeted position line to verify that all data is correct. If there are no changes, enter Reason Code “44” (Adj Budget/Base Reconciliation) and then “SAVE” each position line to ensure that the data and name of the incumbent are accurately recorded. (The “Save” button is at the bottom left of the panel).
- If any field in the “Budget Position Data” or “Budget Position Funding Data” sections need updating, enter a Reason Code, make the appropriate changes, and Save the record. **(See Appendix G for a listing of reason codes.)**
- If you wish to change the **funding source**, enter a reason code and enter the speedtype for the new funding program in the “Speedtype” box of the “Budget Position Funding Data” section. Tab out of the box, check that the correct new funding source is displayed, and save the record.
- Use the same procedure to change the **Account Code and or Earnings Type**.
- If the pay amount (“Original Amt” and/or “Requested Amt” fields) is incorrect, make the necessary adjustment by entering positive or negative (-) amounts in the “Base +/-” field and the “CAR +/-” field. The system will automatically update the record when it is saved. When completed, check the amounts in each row to be sure that they correspond to their respective funding source and that the total in the bottom row is what should be budgeted for the position.
- If you wish to add a new funding source, enter a reason code and click on the blue “plus” symbol in the upper right portion of the “Budget Position Funding Data” section; then enter the appropriate information for the data elements corresponding to the additional funding for that position. The math will be done automatically when the record is saved. Check to see if you have entered the correct amounts.
- Do not use dollar signs (\$) as they will be rejected by the system. Show only whole dollars; do not use cents. Round all figures to the next highest dollar per your calculation (with exception of the calculated amount for the hourly pay rate for classified employees, which may be shown with up to six decimal places in the FTASR).

Adjustments to existing or new one-time salary credits may be budgeted in the budget preparation system. Please note that the credit **may not be entered until it has been **formally approved by BFP**.**

The Effect of Grants and Contracts on Budget Development

Previously, unique speedtypes for some anticipated grants and contracts would not normally be available while the budget is being prepared. These situations—where a new grant has been or is expected to be awarded, but official confirmation has not been received—make it difficult to budget salaries and wages for persons whose funding source had not yet been confirmed. A similar situation might occur when multi-year grants change program numbers each "grant year" but the new grant number has not yet been assigned.

Procedures now exist that enable departments to budget positions on new speedtypes and relieve much of the pressure to process budget changes and expense transfers after the beginning of the fiscal year. When there is knowledge that a sponsor will make an award, UBM's should work closely with representatives from the Office of Grants Management (OGM) or the Office of Industry Contracts (OIC), as appropriate, to ensure that chartfields are set up in advance of the award start date and to establish a pre-award speedtype.

- [View the policy and procedures for creating chartfields in advance of the award start date.](#)
- [View the policy and procedures for pre-award spending.](#)
- [Access the single form to initiate either of these special requests \(Guarantee/Pre-award Spending Chartfield and Speedtype Request\) on the Executive Vice President for Research and Innovation website.](#)

Grants and Contracts that Expire During the Fiscal Year.

This year, under certain circumstances, units may use Research Incentive Fund (RIF), [i.e., Rxxxx program] to budget positions when the associated grant expires during the fiscal year. The RIF funds will serve as a temporary placeholder for positions until the actual grant award is distributed by the sponsor. The following chart shows when the RIF option may be used. Please contact your budget analyst for more information.

Grant Expiration Date	Budget Position Method Necessary
October 1, 2013 – March 31, 2014	Chartfield in Advance of Award
April 1, 2014 – June 30, 2014	RIF position may be established until actual award from sponsor

Using these non-general fund budgeting procedures, departments should be able to budget positions on the correct funding program at the front end of the budget process and reduce the need to process numerous position control and payroll corrections after the beginning of the new fiscal year.

Lump Sum Position Budgeting

Lump sum amounts are to be budgeted in the same manner as vacant positions except that a special Lump Sum Type code identifying each lump sum must be shown in the Lump Sum Type field. The available Lump Sum Budget Codes are shown in a drop-down box. Lump sums may be budgeted for the following items:

- Adjunct Faculty, Part-Time Lecturers and Instructors (but not Term Faculty positions, which should each be entered as a separate budget line)
- Administrative X-Pays (for example, those amounts budgeted for faculty on special administrative duties such as Assistant or Associate Deans)
- Budget Reallocation
- Part-Time Clinical Instructors
- House Staff Salaries
- Overtime Wages
- Shift Differential Wages
- Student Wages
- Medical Residents
- Temporary and Casual Wages
- Post-Doctoral Salaries

Current Expense Budgeting

The Current Expense budget page is an abbreviated form of the Positions page. The information provided includes all current expense amounts which were originally budgeted as of July 1, 2013. Any CAR adjustments made since July 1st, **if not already entered**, will need to be input to the BPS.

Check all items on the screen for accuracy. Remember these aspects of current expense budgeting:

- If you do not wish to make changes to a specific budget line, verify the budgeted amounts as correct and proceed to the next budget line. Many current expense items will require little or no change to that already shown on the screen.
- If you wish to adjust the budget amount only, either up or down, enter a reason code and show the amount of increase or decrease in the “Base +/-” box and also in the “CAR +/-” box. The system will total the items automatically when the record is saved.
- Use the individual Account Code appropriate for the type of expense. [View the complete listing of Account Codes on the Vice President for Finance website.](#)

SUBSEQUENT CHANGES TO THE BASE BUDGET

After the BFP completes the University-wide BBR, units will be notified that the BPS is again accessible to units. Occasionally, the BPS will be temporarily closed to the units while certain central processing and reconciling takes place.

For the most part, changes to the proposed FY15 Operating Budget, after the initial (electronic) submission of your BBR can be done through the BPS, simply by identifying specific line numbers to be changed, deleted or added. This will be a largely decentralized process which requires unit business administrators to keep their budgets in balance. That is, for general funds **the total of any increases in certain budget lines must be offset by a similar total of decreases in other budget lines.** BFP monitors' unit budget balances on a weekly basis during the budget development cycle and will contact Unit Budget Coordinators to correct out-of-balance situations.

There may be times when the bottom line budget of units will need to change. This may be due to strategic initiatives, budget reductions to schools or programs, or transfers of budgets between major units. So that these changes can be recorded properly and processed in a consistent manner, the new BRR/BCO form will be used to document changes to the system. The unit should complete a BRR/BCO and submit it electronically to the appropriate BFP Policy and Budget Analyst. [Access the BRR/BCO form and instructions on the BFP website](#), a sample BRR/BCO is shown in **Appendix B**.

VSIP CREDIT INSTRUCTIONS

In the spring of 2013, the University offered a Voluntary Separation Incentive Program (VSIP) to faculty and staff. The VSIP program provided eligible faculty and staff a financial incentive to separate from employment status with the University. The voluntary separation incentive will provide Leadership with the opportunity to strategically reorganize and reallocate faculty and staff positions across the University.

During the development of the FY 15 operating budget, BFP will add VSIP credits at the **Dean / VP Level** and **prior to**, reconciliation. Thus, at the beginning, your budgets are reduced by the amount of the VSIP credit.

The credit is reflected by a unique VSIP program number and is being added to the S&E account code (541000). For example, a CSD will have a VSIP credit of \$20,000 in VSIP program 0xxxxx budgeted in account code 541000. To fund the VSIP credits each unit must reduce the appropriate "unit" program(s) in BPS to cover the VSIP credit.

Below are examples of options to cover credits:

- 1) Delete position(s)
- 2) Reallocate funds from another position
- 3) Use other funding source(s)

Additional information will be provided at the January 13th meeting.

BUDGET REVISION REQUEST/BUDGET CHANGE ORDER (BRR/BCO)

The budget revision request form is used to revise the current and CAR budgets. After the BBR, we also required the units to submit budget change orders to document changes to the new year budget. The two forms are now combined into a new **BRR/BCO** form. [Access the BRR/BCO form](#) and [BRR/BCO instructions](#), sample available in **Appendix B**.

OTHER BUDGET DEVELOPMENT ACTIVITY

PROGRAM BUDGETS - Self-Supporting Entity Budget Request Instructions

Program budgets are revenue generating self-supporting entities. These programs are in the 1x, 4x and Sx program categories. The program budgets are due to your budget analyst on **Friday, February 7, 2014**. Please use the instructions below to complete the program budgets.

1. Run the Self-Supporting Entity Budget Worksheet found in University Reports.
Financials – Department – Planning
2. Export this report in Excel Format to a folder of your choosing.
3. Review Three Year History and Complete the 2015 proposed section on the Excel file.
All revenue and expense projections should be rounded to the nearest 100.
University Policy states that any change to self-supporting entity budgets should be equal to or greater than \$5,000.
 - a. Estimate any revenue you expect to receive during the new fiscal year.
 - b. Estimate all expenses you expect to incur during the new fiscal year including salaries, fringe benefits (28.5% of salary) and operating expenses.
 - c. Estimate a 3% salary increase for FY15.
 - d. Estimate any departmental credits you expect to receive during the new fiscal year.
 - e. Add subtotal formula to the revenue and expense sections.

BASE BUDGET RECONCILIATION
2014-2015 OPERATING BUDGET

- f. Add a formula to subtract expenditures from total income. Total revenue should equal total expenses for a surplus/deficit on the new fiscal year of zero.
 - g. Suggestion, you can add a column and formulas to calculate the change from FY14 to FY15.
- 4. Fill in the description of program and explanation of amounts requested – text box at the bottom of the report.
- 5. Send completed Program Budgets Excel spreadsheet via email to your Policy and Budget Analyst.
- 6. You will receive notification from your budget analyst when your program budgets are approved.

APPENDICES

BASE BUDGET RECONCILIATION
2014-2015 OPERATING BUDGET
