

Minimum Guidelines for Graduate Education In the School of Nursing (Revised)

University of Louisville

Approved by Doctoral Academic Affairs Committee: May 13, 2016

Approved by Faculty Organization: May 20, 2016

Approved by School of Interdisciplinary and Graduate Studies August 30, 2016

Minimum Guidelines for Graduate Education

To ensure high quality graduate education programs, the university and the School of Nursing maintain minimum guidelines for admission and performance of graduate students, for faculty involvement in graduate education and for proper academic administration. The faculty of the School of Nursing has the academic authority and responsibility to establish rigorous and effective: admission requirements, curricula, instruction, examinations, and recommendations to the Board of Trustees for granting of degrees for programs within the unit. (Redbook Article 3.3.2.)

The faculty of each Unit shall establish and publish its own set of policies and procedures for its graduate programs in the university catalog. Individual academic units and graduate programs may establish policies that are more stringent than those set forth in the Board of Trustees approved **Minimum Guidelines for Graduate Education**, but may not establish standards that are lesser.

I. Academic standards for students in graduate programs of the School of Nursing

A. Admissions standards

1. All applications for graduate program admissions shall include: (a) a completed application, (b) an application fee, (c) official transcript(s) for all previous post-secondary coursework, and (d) at least two letters of recommendation. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from a regionally accredited institution and completion of an accredited (NLN, ACEN, or CCNE) baccalaureate program in nursing must be verified. The NLN, ACEN, or CCNE program accreditation requirement is waived for master's entry into professional nursing (MEPN) concentration applicants.
3. The minimum undergraduate grade point average that will be considered for unconditional acceptance and admission is **GPA 3.0** for baccalaureate prepared applicants and **3.25** for those holding a master degree.
4. Applicants for the PhD program shall provide results from Graduate Record Exam.
5. Unconditional admission to degree seeking status shall be made only if all admission credentials shall have been received, evaluated and approved.
6. Any provisional acceptance shall be made on an individual basis and shall require a statement of the rationale for the exception, plans for monitoring progress and performance and stated success criteria. Such justification must be provided in writing and must be accepted by the faculty and Dean of the enrollment unit. This will allow consideration of special circumstances in which the potential for high quality graduate performance has been clearly demonstrated by other means.

7. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university's catalog may be subject to academic dismissal from the School of Nursing programs.

B. Academic Performance

1. Current curricular and program offerings, including all requirements for degrees are published in the university catalog, which is available at <http://www.louisville.edu/graduatecatalog>
2. The minimum grade point average requirement for good standing and progress toward degree is a 3.0 GPA in the School of Nursing.
3. Any student who does not satisfy the published performance criteria shall be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.
4. Students receiving graduate assistantships (teaching, research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be evaluated annually.

C. International Students

1. All international students shall comply with regulations of the U.S. Department of Immigrations and Customs, its Student and Exchange Visitor Program and all related policies of the University of Louisville International Center.
2. All international students must be registered with the University of Louisville International Center including presentation of evidence of financial resources adequate to support their educational and living expenses in the United States for the duration of their studies.
3. International students for whom English is not their primary language must show English language proficiency by either (1) TOEFL examination scores of: Computer based-220 with an essay of 4; paper based-560 with an essay score of 4; internet-79. or (2) by successfully completing the exit examination for the advanced level of the Intensive English as a Second Language Program at the University of Louisville or (3) by demonstration of a degree award from an acceptable English language institution.

D. Academic Program Administration

1. Policies for administration of academic programs shall be promulgated by the Dean of the School of Interdisciplinary and Graduate Studies (SIGS) following appropriate consultation with: (1) an advisory body of deans or their designees, (2) directors of graduate programs, (3) representatives of the Graduate Student Council and/or (4) the Graduate Council. Final approval of these guidelines shall be made by the University Provost.
2. These administrative policies shall be published in the university catalog, which is available at <http://www.louisville.edu/graduatecatalog> and shall include policies and procedures for: the academic calendar and catalog maintenance, requirements for maintenance of good academic standing, course, credit and degree requirements, grades and grading policies, honors and awards, requirements for theses and dissertations, residency policies, and policies for award of stipends, benefits, tuition and fee remission.

E. Conflict Resolution

Any student who believes that he or she has been treated unfairly, discriminated against, or has had rights abridged may seek resolution of this conflict. Students, faculty and administrators shall first seek to resolve the matter through informal discussion and through administrative channels, and through the University Student Grievance Officer. Should this fail, a student may initiate a grievance at the unit level within one year of the event giving rise to the complaint. The Graduate Student Academic Grievance committee (Graduate Bylaws 2.3.5) will hold original jurisdiction for students enrolled in the School of Interdisciplinary and Graduate Studies and appellate jurisdiction for all other graduate students. All grievance procedures shall be conducted in accord with Redbook Section 6.8.

II. Faculty Participation in Graduate Education

- A. Faculty who participate in teaching graduate level courses shall meet the requirements of the University of Louisville Faculty Credentials Policy. This policy is consistent with the guidelines of the Southern Association of Colleges and Schools Commission on Colleges which state that faculty teaching graduate and post-baccalaureate course work should have an earned doctorate/terminal degree in the teaching discipline or a related discipline. However, units may consider other qualifications (e.g., work experience, research) when determining whether a person is qualified to teach graduate level courses. Such exceptions must be documented and approved by the Dean of the appropriate academic unit and recorded by the Dean of the School of Interdisciplinary and Graduate Studies.

- B. Faculty who chair PhD dissertation committees, and/or chair master thesis committees shall, in addition to the above requirement:
1. Show evidence of active research, scholarship or creative activity with subsequent data-based publications.
 2. Have this responsibility specified in the annual faculty work plan.
 3. Make provisions for continuous availability of student mentoring.
 4. Have a primary appointment in the School of Nursing.
 5. Be tenured or have been tenured in a research university.
 6. Have an earned doctorate.
 7. Have achieved a rank of Associate or Full Professor.
- C. Faculty who direct Doctor of Nursing Practice (DNP) and/or master projects shall:
1. Show evidence of scholarship/creative activity.
 2. Have this responsibility specified in the annual faculty work plan.
 3. Have an earned doctorate.
 4. Have achieved a rank of Assistant Professor or higher.
- D. Faculty who serve as dissertation and thesis committee members shall show evidence of experience in independent research, scholarship or creative activity, or may be appointed because of specific professional expertise of value to the student's program. Such evidence shall include national certifications in area of expertise, publications, funded grants, expertise teaching in a post-secondary education environment and public recognition of value of work. Committee Members from within the School of Nursing must have an earned doctorate. External members must have an earned doctorate. Ex officio committee members are non-voting members of the doctoral committee and must be approved by the dissertation committee chair.
- E. PhD dissertation committees shall be composed of a minimum of four and a maximum of five qualified members, as determined by the dissertation committee chair and student. Master's thesis committees shall have a minimum of three qualified members. The doctoral committee shall have a minimum of one member external to the SON. If an outside member does not have a primary appointment to a University of Louisville faculty, but is otherwise qualified, this person shall be granted ad hoc approval to participate in graduate education for the specific course or committee in question. In the case of joint programs with other universities, a committee member from the other institution may fulfill this requirement.
- F. Faculty certified for participation in graduate education shall be evaluated annually for continuation of such status. The criteria for certification and continuation in graduate faculty and mentor status shall be evidence of active research, scholarship/creative activity publications.
- G. All dissertation and theses committees shall provide sufficient expertise in the area of study and sufficient faculty availability for necessary student guidance.

- H. The Doctoral Academic Affairs Committee of the School of Nursing shall certify eligibility of faculty for participation on dissertation, DNP project, and theses committees and shall forward committee rosters upon appointment and upon any changes to the Dean of the School of Interdisciplinary and Graduate Studies.
- I. Exceptions to these guidelines for involvement with graduate education at the masters' and doctoral level must be documented and approved by the Dean of the enrollment unit and by the Dean of the School of Interdisciplinary and Graduate Studies.
