

Learning Objectives:

- Understanding acupuncture from an Eastern/Western perspective, and know the conditions of when to perform acupuncture
- Introduce students to cultural issues with the Mennonite community
- How to work effectively with LGBT patients whose beliefs systems may differ from your own
- Identify contributions to Western Medicine by Muslim Scholars. Discuss perspectives on Islamic Law and current bioethical issues
- Identify Micro-aggressions and how it applies to patient interactions. Improve communication skills with ethnoracial minority patients
- Better understand and appreciate cultural competency in a clinical setting
- Military culture and dual diagnosis of PTSD and substance abuse
- Discuss child discipline vs. maltreatment, and associated cultural implications
- Create a better understanding of the medical/dental hardships faced by refugees and medical interpreters
