Training in Interprofessional Education for Palliative Care in Oncology. \$1,383,452

The goal of this project is to develop a critical mass of competent equipped oncology educators skilled in the development and implementation of interprofessional education for palliative oncology care. Through faculty development webinars and materials, a train-the-trainer

workshop, ongoing educational activities and mentoring by experienced interprofessional educators, 160 health science educators (representing the fields of medicine, nursing, social work and chaplaincy) from 35-50 institutions will develop the skills, knowledge and resources to overcome barriers to IPE and teach oncology palliative care and teamwork to students of multiple disciplines.

Rural Geriatric Integrated Behavioral Health and Primary Care Training Network (RITN)

The Rural Geriatric Integrated Behavioral Health and Primary Care Training Network (RITN) addresses the following needs in 6 rural counties of KY: 1) the strong correlation between the prevalence of chronic medical conditions and poor behavioral health (BH); 2) the lack of a BH workforce and appropriate treatment support for rural vulnerable older adults (VOAs) who are struggling with BH disorders; 3) the struggle to integrate BH into rural primary care (PC) practices; 4) the lack of supportive environments to promote physical health and BH, specifically for rural VOAs, and 5) the need to provide appropriate physical health and BH services to the growing Hispanic population. RITN will serve older adults 65+ with behavioral health needs living in the underserved, rural counties of Bullitt, Henry, Oldham, Shelby, Spencer and Trimble Counties of KY with an additional special emphasis on Spanish speaking older adults.

Kentucky Rural & Underserved Geriatric Interprofessional Education Program

The Geriatric Workforce Enhancement Project (GWEP) has a threefold purpose: 1) to develop an interprofessional education center at the University of Louisville Institute for Sustainable Health and Optimal Aging, that educates and prepares students and professionals from medicine, nursing, social work, dentistry, pharmacy, and community health partners, to function within a transformed integrated patient-centered geriatric primary care and community based service delivery system; 2) to focus the education on creating a workforce that improves the patient experience and clinical outcomes, reduces the cost of care, and improves the work life for those delivering care, and 3) to create Alzheimer's Disease and Related Dementias (ADRD)-friendly communities through ADRD education and training of clinical staff, community partners, persons with dementia, and caregivers.

 Young Survival Coalition (YSC) is the premier global organization dedicated to the critical issues
 unique to young women who are diagnosed with breast cancer. This specific initiative is
 focused on end of life education and planning. We have learned that end of life discussions
 generally happen late in a cancer survivor's journey, and it a programmatic goal of YSC to
 change the conversation. YSC has crafted a three part end of life series taking place once a
 month between October and December 2015 addressing several aspects of end of life. We will
 test the impact of this intervention on learner attitudes, knowledge, and behavior.
