

Once a dream  
is now a reality.

The UofL Physicians Novak Center for Children's Health started out as a dream for a better way to deliver health care for the children of Kentucky and Kentuckiana. Now a reality, our 176,000-square-foot center, located in the heart of the UofL Health Sciences Center in Downtown Louisville, is one of the largest and most technically-advanced pediatric outpatient centers in the country.

Families are now able to have their children cared for in an environment that is designed to put children at ease while giving them convenient access to some of the region's top pediatric specialists and primary care providers, all in one location. The Novak Center features interactive art displays, special events with musicians and other activities, but most importantly, it is home to cutting-edge medical treatments and advances designed specifically to address the health care needs of children.

# State-of-the-art care from the heart.

The UofL Physicians Novak Center for Children's Health was inspired by our patients with complex health care needs who see many of our pediatric specialists. The Novak Center allows cutting-edge and convenient care to be delivered to our patients while making sure visitors of all ages feel welcome and safe. Our center features the following:

## Technology

With seven clinical floors, plus an outpatient lab and imaging services, all furnished with the most technologically-advanced equipment available, the Novak Center is one of the largest and most progressive pediatric outpatient centers in the country.

## Design

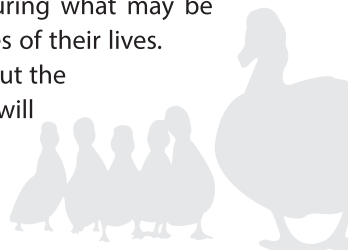

Every element of the building has been chosen with care after years of studying the very best facilities throughout the country to make sure that the Novak Center allows our providers to deliver patient-centered care with compassion and excellence.

## Collaboration

With providers and staff from so many specialties working together in the same location, the shared knowledge and collaboration of care for our pediatric patients will be unmatched.

## Comfort

The environment within the Novak Center has been designed for our pediatric patients and their families to feel safe and cared for during what may be some of the most trying times of their lives. Art will be featured throughout the center and a rooftop garden will be open to all visitors.
