

Current practice in diagnosis and treatment of Parkinson's disease

A THREE-PART WEBINAR SERIES

Learn about the latest diagnostic criteria for Parkinson's disease, best medical management in early and advanced stages and updates on surgical management. Three live webinars will provide the opportunity to gain knowledge and interact directly with Kathrin LaFaver, MD, director of the UofL Movement Disorder Clinic, and the other speakers. Designed for general neurologists, primary care and family physicians, geriatricians and advanced practice providers.

This webinar series is funded by a community grant from the Parkinson's Foundation to improve access to care for rural and medically underserved populations.

Friday, September 21, 2018
Noon - 1:00pm
