

Winter Skin Seminar 2018 Outcomes

1. Please rate the following aspects of this activity.

(1=Strongly Disagree, 2=Disagree, 3=Agree, 4=Strongly Agree)

	Strongly Disagree		Strongly Agree	
Attending this activity improved my competence. [22-3.73]	(1) 4.55%	(1) 4.55%	(1) 4.55%	(19) 86.36%
Attending this activity improved my performance. [22-3.68]	(1) 4.55%	(1) 4.55%	(2) 9.09%	(18) 81.82%
What I learned from this activity has helped me improve my patient outcomes. [21-3.67]	(1) 4.76%	(1) 4.76%	(2) 9.52%	(17) 80.95%

2. If this activity improved your competence, please tell us how. (17)

I learned something

Increased knowledge base

Good quality lectures on pertinent subjects

learnt new treatment strategies and new diagnosis

New information & research presented by leading minds in Dermatology

Clinically relevant lectures

hidradenitis

increased knowledge

More knowledgeable about current data

New techniques for excision of Lentigo Maligna

More accurate diagnosis; more appropriate surgery

One aspect was the new Melanoma guidelines for surgery. Very informative.

Reinforced my current knowledge.

good update on atopic dermatitis - mod/severe treatments; looking for secondary syphilis

Updates from JAAD

Atopic dermatitis

I am not likely to use rifampin combos.

3. If this activity improved your performance, please tell us how. (16)

I am better

Increase knowledge base

I will integrate new techniques based on this conference

i can manage some difficult patients now

Helped reinforce UpToDate information

surgical pearls

increased knowledge

Learned pearls to help make patient care more efficient

Smaller excision on cosmetically concerning areas

As above

I was encouraged to engage in more patient centered encounters.

Improved my diagnostic accuracy.

treatment of Lentigo malignant melanoma and biopsies; assessment psoriatic arthritis

More confidence in dx of sclerosis d/o and management

Rating pruritus and evaluating sleep deprivation due to pruritus

I have more options in my tool. I'd to treat hidradenitis and new labs to draw for dermayomyositis

4. Discuss how your Patient Outcomes (omit patient names) have improved as a result of attending this activity. (15)

New treatments

More treatment options for alopecia have helped patients

updated treatment options that were available

New treatment techniques and new uses for old medications that improve safety & efficacy

To be determined

better eczema and psoriasis usage

I have used pearls in my practice

Still high cure rate but less morbidity in treating Lentigo Maligna

better at listening to patients

Happier patients who communicate through surveys that they are very pleased with the level of care they are receiving.

Prompted additional testing for some patients.

for atopic dermatitis using more baths/soaks and not necessarily with bleach - seems to be helping

Recommended regular home BP monitoring for pt with systemic sclerosis

After follow up atopic dermatitis was improved

They have more treatment options

5. Identify practice changes you have made as a result of attending this activity. (13)

Different protocols

None

not much

Altered injection technique for cicatricial alopecia, expanding use of new medications based on safety data

Started using squaric acid again

more confident when treating complex autoimmune and autoinflammatory diseases

I am recommending less sunscreen with nano particles

Tips in Derm Surgery

Pay more attention to details in actual office procedure

I ask my patients if they have any other concerns before moving toward the door..

water baths and less bleach baths; on the look out for atypical secondary syphilis

See 3 above

Rifampin is now in my treatment list

6. What topics do you want to hear more about, and what issue(s) in your practice will this help address? (15)

Practice management

Scabies

General dermatology, surgical technique and filler and Botox technique

mostly medical, and some surgical and some cosmetics

ongoing research of new medications especially when a new receptor or new disease mechanism is discovered

Similar topics

biologics; PDL-1 receptor inhibitors; comprehensive skin cancer analysis

therapies for common diagnoses

Comparison of Biologicd for psoriasis to aid in making best recommendations for patients

How to deal with govt interference in my practice of medicine

More methods to improve surgical outcomes.

management of atypical moles

biologic choices constantly changing so updates always good - helping choose biologics for psoriasis etc

Grover's disease

Medical dermatology

This evaluation is confidential and no individual will be identified by this office (Continuing Medical Education and Professional Development). It will only be used for quality improvement.

We look forward to seeing you at future University of Louisville events. Thank you very much.
