May 31 - June 2, 2019

Ojai Valley Inn & Spa
905 Country Club Road
Ojai, CA 93023

Conference Overview

Each year, nationally recognized leaders in medical, procedural and aesthetic medicine convene in Santa Barbara to discuss and review the current state of knowledge in their respective dermatologic specialties. This program in medical dermatology features key clinical topics, including atopic dermatitis, acne vulgaris, cutaneous cancers, rosacea, psoriasis, and other important issues.

Target Audience

Dermatologists, Nurse Practitioners, Physician Assistants, and Registered Nurses.

Learning Objectives

As a result of participating in this activity, the participants should be able to:

- ▶ Discuss new approaches to therapy including pathway targeted therapy in the treatment of melanoma.
- ▶ Assess the role of diagnostic tools and technology in diagnosis and detection of skin cancers.
- ▶ Compare and contrast the efficacy and safety of agents, devices, and techniques currently available in aesthetic and procedural dermatology.
- ▶ Integrate into daily practice evidence-based recommendations on new and emerging therapies for common dermatologic diseases.
- ▶ Analyze treatment approaches for the pediatric patient with common as well as complex skin diseases.
- ▶ Implement updated strategies for managing acne, rosacea, atopic dermatitis, contact dermatitis and psoriasis.
- ▶ Recognize the factors that are important in selecting appropriate filler agents for treating different areas of the face and targeted planar depths.
- ▶ Determine the appropriate nonsurgical techniques for facial rejuvenation based on an enhanced understanding of facial anatomy.
- ▶ Explain the roles of currently available biologic agents in the treatment of psoriasis and psoriatic arthritis, and appropriately incorporate newer biologics into therapeutic practice as these become available.
- ▶ Incorporate the recent research advances in understanding and treating pediatric dermatology issues such as atopic dermatitis and pediatric acne.
