Legend

percent question responses
Proportion of a specific response (Qa) to the sum of all responses provided for that question (Qt).
 $percent\ of\ total\ question\ responses = Qa / Qt$
(Example: X% of all responses to question Y were "A".)

† Percentages are calculated in three different ways. Click on the "Show Extended View" option at the top of the report to display the additional calculations. In cases where a question is required and only one response is allowed, all three percentages will be equal. The difference between the three calculations is most notable in a choose-all-that-apply question type that is optional.

Meetings are quite psoriasis/biologics heavy and cosmetic heavy. Would love to see review of other relevant topics. Drug reactions? New autoimmune issues? Also more surgery stuff like Mohs tips, defect repairs. I don't go to the AAD meeting any more—you are it! So would like to broaden my education.
