

Santa Barbara Dermatology Meeting 2019 Outcomes

1. Please rate the following aspects of this activity.

(1=Strongly Disagree, 2=Disagree, 3=Agree, 4=Strongly Agree)

	Strongly Disagree		Strongly Agree	
Attending this activity improved my competence. [7-3.71]	(0)	(0)	(2) 28.57%	(5) 71.43%
Attending this activity improved my performance. [7-3.57]	(0)	(0)	(3) 42.86%	(4) 57.14%
What I learned from this activity has helped me improve my patient outcomes. [7-3.57]	(0)	(0)	(3) 42.86%	(4) 57.14%

2. If this activity improved your competence, please tell us how. (7)

additional up to date information

More competence in using Biologics, different approach to recommending sunscreen use, different approach to excising/treating melanoma in situ, thinking about office and surgical ergonomics, altering my approach to atopic patients,

gave me many new ideas to treat patients with novel approaches.

better understanding

Improved contact dermatitis diagnosis and which shampoos are safe for these patients

I have up to date information on new therapies

I am now better able to identify roadblock to treatment for various skin conditions that I previously was unaware of.

3. If this activity improved your performance, please tell us how. (6)

new skills in surgery

See above

better understanding

Some tips on office ergonomics were given to help alleviate strain from my surgeries

I value the framework for diagnosing dermatitis types and treatment ideas

I am now able to treat conditions and manage patients given the information I have received through this activity.

4. Discuss how your Patient Outcomes (omit patient names) have improved as a result of attending this activity. (5)

Too soon to implement and see back for follow-up

I've give patients compounds and dosing I hadn't considered before (i.e. Lamisilx 7days each month with no lab testing).

understood better

Improved results with treatment of scalp conditions

I am able to use the therapeutic approaches to treating skin conditions that Zirwas outlined for us. I am able to help make decisions about melanoma and think about surgical treatments of skin cancer as Burnett instructed. I now know how to bridge biologics as Heffernan described.

5. Identify practice changes you have made as a result of attending this activity. (5)

Start on Biological of choice rather than that best covered by insurance Consider Mohs surgery for Mwanoma in situ, Buying more ergonomic surgical chairs Sharing information learned with my 4 other practice colleagues

na

Improved office ergonomics

I have given a trial of oral metronidazole for recalcitrant lichen planus

I can now confidently prescribe biologics. I now know how to think about melanoma and surgical literature. I have a better understanding of how to interpret my slides.

6. What topics do you want to hear more about, and what issue(s) in your practice will this help address? (5)

Vitiligo, Medicare billing, topical psoriasis therapies for patients not wanting or needing biologics, hair and scalp evaluation and treatment, nail evaluation and treatment, drug eruptions, non-diagnostic, diffuse eruptions, melanoma and non melanoma skin cancers, topical anti-aging products,

More practice management

HS

Want to hear more technique-driven surgical talks rather than just seeing before & after defects

More on melanoma management, surgical management of skin cancers, topics in dermatopathology and practice management.

This evaluation is confidential and no individual will be identified by this office (Continuing Medical Education and Professional Development). It will only be used for quality improvement.

We look forward to seeing you at future University of Louisville events. Thank you very much.
