

SkINternal Medicine 2019: Dermatology for the Non-Dermatologist Outcomes

1. Please rate the following aspects of this activity.

(1=Strongly Disagree, 2=Disagree, 3=Agree, 4-Strongly Agree)

	Strongly Disagree		Strongly Agree	
Attending this activity improved my competence. [38-3.61]	(1) 2.63%	(0)	(12) 31.58%	(25) 65.79%
Attending this activity improved my performance. [37-3.57]	(0)	(1) 2.70%	(14) 37.84%	(22) 59.46%
What I learned from this activity has helped me improve my patient outcomes. [37-3.57]	(1) 2.70%	(3) 8.11%	(7) 18.92%	(26) 70.27%

2. If this activity improved your competence, please tell us how. (25)

More limitations on length of antibiotic usage

More confident when treating dermatological conditions

Helped me to i.d. skin issues

Gave me details about how to better diagnose and treat skin conditions

Improved acne treatment

Knowledge and treatment options

Recognizing & differentiation of different skin diseases

Treatment of acne

Recognition of certain skin conditions.

Multiple clinical pearls that I am using almost daily. Ex: stopped office use Neosporin. Vaseline only now. Aggressive and early Rx for acne to prevent scarring. etc etc.

This activity was full of so much information. I am a student NP and I found this conference very enlightening.

learned best practice for initiating acne treatment

Improved ability to dx and tx especially psoriasis and rosacea

How to better dose corticosteroids. What the dose if area is in the skin folds can double the doee

better identification and treatment

better attention to skin lesions

better able to dx skin disorders

I learned many more options for treatment of different rashes and disorders.

better understanding of diagnostic criteria

more informed w prescribing of steroids and acne meds

helping to treat acne

I feel more confident in diagnosing and implementing treatments for less common dermatology issues.

more confident in diagnosis and referral for skin issues

Knowing more on hyperhidrosis

I understand what medicinal treatments should be used for different skin diseases. I am also better at diagnosis.

3. If this activity improved your performance, please tell us how. (20)

As above

Improved biopsy confidence

Knowledge and treatment options

Good refresher in some of the less common skin conditions

Treatment of acne

Assessing skin

My performance is improved because I am more confident in making my diagnosis and treating.

It really helped with understanding different dermatology issues that arise in primary care and how to treat.

I've changed my approach to acne management

See above

Recognize the common things in dermatology not the zebra as my Confidence and recognizing certain rash pattern and dermatology are more appropriate when diagnosing rashes.

better management of rosacea

can answer patient questions with more confidence

Based on the discussion at the conference, I have started using higher strength steroid creams for different problems, as recommended.

procedural skills

Sharpened my assessment skills.

quicker assessment

Proper technique for wound culture

See above.

4. Discuss how your Patient Outcomes (omit patient names) have improved as a result of attending this activity. (16)

Able to dx faster

n/a

Better referrals

Haven't yet

To early to say but I know patients are receiving the most up to date care in dermatology and the results are expected to be improved.
I am better at identifying derm issues in clinical practice.
I've not been able to see results as of yet
Improved control of rosacea and acne
Treating and following up on skin conditions
Lowering steroid doses to prevent skin atrophy.
student, better treatment of dermatitis
rosacea versus lupus butterfly rash, not distinguishable
my patients have experienced quicker healing times and resolution of rashes.
I feel more confident in starting treatment for more dermatological issues prior to referring to dermatology.
Used information to obtain a wound/lesion culture
Seeing better results from treatments I provide.

5. Identify practice changes you have made as a result of attending this activity. (23)

Less antibiotics for acne
Encouraged less neosporin
I am trying not to refer to Derm as much if I can easily identify common skin conditions
HS referrals
Ski care for acne
Does not apply. I am a pathologist who needed to learn more dermatology
None so far
First line retinoids
Change of medication to treat conditions.
No Neosporin. Aggressive early Rx for acne. Purposeful skin exam as part of every physical exam. Biopsy more lesions to get to the correct dx quicker. Careful with steroids-
I do not fear prescribing isotretinoin.
Changed the first choices for acne treatment
Treating with some otc agents recommended at conference for pts who need cheaper alternatives
Looking more closely at rashes and being able to clinically describe them and a more accurate terminology which puts diagnosing differentials into a new perspective than I had before.
higher steroid doses,
referral to dermatologist more readily
no significant practice changes yet
. Aggressive acne treatment
always prescribe a retinoid for acne

Educating patients about skin care related to acne and treating acne.

I will be performing more shave biopsies.

Better acne care

Ordering different prescription medications now.

6. What topics do you want to hear more about, and what issue(s) in your practice will this help address? (15)

Skin cancers

skin conditions that often indicate underlying disease

Urticaria

I love what you've done with the program, keep up the fantastic work!

More treatment options

Acne every year. Cancers every year. Tanning and sun blocks. nail pathology and link to internal disease.

simple derm procedures.

Skin manifestations of medical conditions

Peds rashes

Rosacea the different forms of psoriasis and drug rashes

hyfreator basics

urgent care skin conditions

specific medications to use w issues. Pictures of specific skin issues.

I would like to learn more about autoimmune diseases.

Biopsy techniques of large plaques. I have a patient having a hard time seeing derm but I am unsure of best way to biopsy

This evaluation is confidential and no individual will be identified by this office (Continuing Medical Education and Professional Development). It will only be used for quality improvement.

We look forward to seeing you at future University of Louisville events. Thank you very much.
