

Winter Skin Seminar 2019 Outcomes

1. Please rate the following aspects of this activity.

(1=Strongly Disagree, 2=Disagree, 3=Agree, 4=Strongly Agree)

	Strongly Disagree			Strongly Agree
Attending this activity improved my competence. [21-3.67]	(0)	(2) 9.52%	(3) 14.29%	(16) 76.19%
Attending this activity improved my performance. [21-3.62]	(0)	(3) 14.29%	(2) 9.52%	(16) 76.19%
What I learned from this activity has helped me improve my patient outcomes. [21-3.62]	(0)	(3) 14.29%	(2) 9.52%	(16) 76.19%

2. If this activity improved your competence, please tell us how. (15)

new therapeutic options

Learned something

I'm in family practice and would not initiate biologics, rather I'd refer to a dermatologist

I really liked the dermoscopy discussion and hair discussion. It went in depth about medications that I felt was very thorough

Knowledge of patient care

No more liver biopsies with mtz

I had a female acne patient with whom I was able to uncover PCOS after ordering and interpreting her bloodwork.

Clinically oriented lectures provided pertinent and up to date information.

I have instructed all my providers re workup and management of female hair loss.

More familiar with antihistamine dosing for urticaria

dermoscopy skills

Increased by knowledge and confidence with dermoscopy.

improved dermoscopy skills

Treatment of urticaria and alopecia

Great speakers and topics covered

3. If this activity improved your performance, please tell us how. (10)

expanded differential diagnoses

Learned something

See above

Same as above

Confidence to use mtx longer

I have actually recently had several widespread psoriasis patients with comorbidities, with whom I have confidently started on various systemic agents, from TNF inhibitors to IL 17 and 23 agents.

It will help with daily patient care

Doing more oral exams looking for melanoma after seeing oral path lecture

decisions regarding hormonal treatment for acne clarified

Same

4. Discuss how your Patient Outcomes (omit patient names) have improved as a result of attending this activity. (7)

Have not had any to evaluate

N/a

Patients have avoided liver biopsies

I've had only a few of my psoriasis patients back for return visits, but this one in particular has cleared in her scalp after only one month on an IL 23 agent, which she is tolerating well.

Able to more competently treat female pattern hair loss.

acne treatment improved, nevi assessment

Improved urticaria treatment as well as alopecia

5. Identify practice changes you have made as a result of attending this activity. (6)

improved oral exams

Implemented learning objectives

See above

None that come to mind at this time, other than the increased confidence in prescribing biologics.

using dermatoscope more on nevi, comparing ant and posterior part widening on hair loss more regularly

Increased utilization of Xolair and more aggressive use of spironolactone

6. What topics do you want to hear more about, and what issue(s) in your practice will this help address? (8)

Financial and Practice Management. More business talks

If anything is new on female hair loss, cosmetic dermatology

PRP, dermoscopy, dermatofibroma sarcoma/melanoma/aggressive skin cancers, immune mediated rashes like dermatomyositis

Dermpath

This is a great conference

Various light and laser treatment applications, as we have a few of these machines.

Alopecia algorithms, and hypersensitivity reactions and work ups.

Hair loss, hand eczema, warts

lectures were not as strong as in the past

This evaluation is confidential and no individual will be identified by this office (Continuing Medical Education and Professional Development). It will only be used for quality improvement.

We look forward to seeing you at future University of Louisville events. Thank you very much.
