

PREVENTION & THERAPIES FOR HEPATITIS AND CHRONIC LIVER DISEASE

Seattle, WA

Renaissance Seattle Hotel

515 Madison Street

SATURDAY, SEPTEMBER 17

7:30am – 4:30pm

This face-to-face seminar focuses on key challenges in the prevention, treatment and patient management approaches associated with viral hepatitis, advancing cirrhosis, liver cancer, fatty liver disease and other hepatic conditions. The updated content is drawn from latest medical guidelines and clinical trial results.

A hybrid format combines live lectures with web-based pre- and post-program assignments. Local faculty experts will deliver state-of-the-art material utilizing a curriculum that features lectures, case analysis, current clinical trial outcomes and progress reports on promising diagnostic approaches and emerging therapies.

The seminar is also available as a web-based, self paced Enduring Material.

Topics to be covered include:

- ▶ Viral Hepatitis: The origins and pathways of HBV, HCV and Delta Hepatitis
- ▶ Hepatitis vaccines, prevention models and avoiding reactivation of the virus.
- ▶ The elimination of Hepatitis B
- ▶ SARS-CoV-2 and liver disease.
- ▶ End-stage liver disease, cirrhosis, tumor reduction and transplant options.
- ▶ Alcoholic liver disease and Alcoholic hepatitis
- ▶ Hepatocellular Carcinoma – management approaches and new immunotherapies
- ▶ Identifying and treating Fatty Liver Disease and NASH
- ▶ PBS and PSC – the latest outcomes from EASL and AASLD
- ▶ Treating and curing liver disease in special populations

Those who complete this activity will better identify how to screen, diagnose and treat their patients with Viral Hepatitis, Cirrhosis, Liver Cancer, Fatty Liver Disease and more.
