SEMINAR OVERVIEW

This seminar series will provide updates on the diagnosis and treatment of the dominant forms of viral hepatitis and explore the latest data on advancing liver PBC, Steatotic Liver Disease and other hepatic conditions. Faculty experts will deliver state-of-the-art material utilizing a curriculum that features lectures, case analysis, current clinical trial outcomes and progress reports on promising prevention approaches and emerging therapies.

Available in two formats, the content may be explored as both a live, face-to-face seminar or a web-based, self-paced Enduring Material. It is even possible to combine the two modalities. Either way, the goal of this CME activity is to limit future cases and improve the outcomes of those already infected.

WHY YOU SHOULD ATTEND

- UPDATE your clinical knowledge with expert faculty and internationally recognized studies
- VALIDATE your clinical decision processes and patient care approaches
- COLLABORATE with local colleagues to discuss new diagnostic and treatment options

FUTURE EVENTS:

April 27: Miami, FL
May 4: Seattle, WA
September 7: Atlanta, GA
September 21: Cincinnati, OH
October 5: Pasadena, CA

PREVENTION & THERAPIES FOR HEPATITIS AND CHRONIC LIVER DISEASE

NEW FOR THE 2024 SEMINAR SERIES

- Innovative agents and immunotherapies for hepatocellular carcinoma.
- Clinical trial outcomes for Primary Biliary Cholangitis.
- The growing number of Alcohol-associated liver disease cases and innovative treatment options.
- Breaking news and treatment approaches for SLD (formerly NAFLD and NASH).
- The latest updates and scientific breakthroughs from EASL, DDW and AASLD meetings.
- An updated Hybrid Delivery Platform that utilizes live, F-2-F Presentations and/or Web-based lectures to optimize Learning outcomes and Time efficiency.
COURSE DIRECTOR
Paul Pockros, MD, FAASLD, FACP
Director, Liver Disease Center, Scripps Clinic
Medical Director, SC Liver Research Consortium

This seminar is also available as a self-paced, Web-based learning activity that has all the content of the live event and a faculty of national experts.
Engage in the seminar at a convenient time and place.

PROGRAM HIGHLIGHTS
The seminar topics are presented in live presentations and supplemented by multi-media pre and post-course assignments. This allows us to make the most of our time together for group discussion, case analysis and patient management approaches.

- HCV diagnosis and treatment updates
- Epidemiology of Hepatitis B and the best anti-viral therapies
- The growing incidence of Delta Hepatitis and its relationship to HBV
- Clinical cases to explore End-stage Liver Disease and transplant options
- New and emerging therapies showing promise for the treatment of Hepatitis F and G
- Alcohol-associated liver disease
- Diagnosing and treating Hepatobiliary Syndrome, Hepatic Encephalopathy, and Thrombocytopenia
- The explosion in Fatty Liver Disease: A dangerous step on the pathway toward Cirrhosis and HCC
- Promising clinical trial data on MASLD and MASH treatment
- Caring for liver patients in special populations and circumstances
- The seminar topics are presented in live presentations and supplemented by multi-media pre and post-course assignments. This allows us to make the most of our time together for group discussion, case analysis and patient management approaches.
