

# 2024 NEURO-ONCOLOGY SYMPOSIUM: TARGETED THERAPY & IMMUNOTHERAPY IN NEURO-ONCOLOGY

**Saturday, June 8th, 2024 | 7:30am - 4pm**  
ShelbyHurst Conference Center

Immunotherapy is a type of treatment that works to stimulate or suppress the immune system to teach the body to fight cancer. Studies in immunotherapy hope to help the immune system recognize and fight abnormal cancer cells that have traditionally suppressed immune responses. UofL's 2024 Neuro-Oncology Symposium will focus on the developments in immunotherapy in neuro-oncology, current treatments and clinical trials, and the outlook for future brain tumor patient outcomes.
