

Increase your ability to Screen, Diagnose and Treat your Patients for Irritable Bowel Syndrome (IBS)

By Attending this Complimentary CME Event

“Increasing Physician Awareness and Treatment Outcomes for Irritable Bowel Syndrome (IBS-D)”

Houston, TX

Thursday, November 9

8:00 a.m.

Baylor College of Medicine
Conference Room A (1st Floor)
7200 Cambridge St.

Nearly 1 in 10 adults and nearly 15% of children suffer the fluctuating symptom patterns of abdominal pain, disturbed defecation, and extra-intestinal symptoms associated with Irritable Bowel Syndrome. IBS represents a significant health burden owing to direct medical costs and indirect costs. Misdiagnosis and under treatment lends to waste and unnecessary patient suffering.

Diet, stress and other sociocultural factors can influence prevalence, health care-seeking behavior, symptoms, and treatment response. Regrettably, practicing physicians and mid-level providers do not always fully understand the pathways and treatment options available now and those in development.

Topics to be covered in this highly interactive seminar include:

- An overview of the pathogenesis of IBS in adults and children
- An updated classification system for IBS, the Rome IV diagnostic criteria
- Management of IBS-D Patients through diet and behavioral approaches
- Recently approved therapeutic agents for IBS-D

Those who complete this activity will better understand how to screen, diagnose and treat their patient with Irritable Bowel Syndrome and when to refer them for more advanced care.

There is no charge for this event, but space is limited and Pre-registration is Required.
